**Year:** 2009  
**Field Note:**  
Population based Services amountt decreased from 2007 to 2008 and then increased in 2009. This is due to the fact that the DOH is moving from a local health department focus to one more aligned with a state health department. Less direct serivces are being provided. Budget amounts for enabling services and infrastructure building increased as dollars are contracted out through RFAs and RFPs.

## FORM NOTES FOR FORM 7

CHA does not have an unintegrated information system that captures data necessary for completing this form. Programs maintain counts of clients served in the various MCH programs operated by CHA. The numbers reported here represent undercounts insofar as we have reported numbers served in the larger programs only, recognizing that to sum clients served across programs would likely result in many duplications.

## FORM NOTES FOR FORM 8

Information shown here on total deliveries and infants in state was obtained from the 2006 birth file, State Center for Health Statistics. Eligible for Title XIX taken from a linked file of 2006 births on Medicaid.

Information on infants served taken from newborn screening file for 2006.

The District of Columbia is located in a tri-state area that includes the District, Maryland, Virginia. The District has a large number of out-of-state births as residents will elect to have their babies in a hospital in Maryland or Northern Virginia.

**STATE PROFILE FOR FY 2009**  
*[Sec. 506(A)(1)]*  
**STATE: DC**

1. State MCH Administration:  
*(max 2500 characters)*

This year the DOH experienced two major organizational events. Under the direction of the Director of Health, Dr. Gregg Pane, DOH was realigned to form seven administrations. The realignment reduced the number of DOH administrations from 11 to seven, reallocated staff to a new procurement and grants management function, and created a new focus on performance accountability. The new DOH operational structure incorporates many of the recommendations from DC Mayor Adrian Fenty's Pre-Transition Health Team. The primary changes included 1) the integration of the Bureau of Epidemiology and Health Risk Assessment with the State Center for Health Statistics and the State Health Planning and Development Agency to create a Center for Policy, Planning and Epidemiology. 2) Changing the name of the Maternal and Primary Care Administration to the Community Health Administration (CHA). This Administration is responsible for the Office of Grants Management and Program Planning, Perinatal and Infant Health Bureau, CSHCN Bureau, CASH Bureau, and the Nutrition and Physical Fitness Bureau. A copy of CHA's organizational chart is enclosed as an attachment. In October 2008 the Lead Program moves to the District Department of the Environment. In March 2008 Mayor Fenty named Pierre N.D. Vigilance, MD, MPH as Director of DOH. Dr. Vilgiance served as the director and health officer of the Baltimore County Department of Health since 2005. Other significant staff changes within the Community Health Administration include assignment of Charles Nichols, MPP, Chief, Grants Monitoring and Evaluation and Nathaniel Beers, MD, Deputy Director of Policy and Planning. Brief biographical sketches of Mr. Nichols and Dr. Beers are enclosed as an attachment. Dr. Cano continues as the Senior Deputy Director of the CHA and fully supports and advocates CHA's overarching goal to improve the health and well being of residents by reporting, investigating and controlling communicable diseases, prevention of chronic diseases and their complication, and engaging in health care system planning to meet the service needs of the population. CHA focuses on carrying out the Mayor's initiatives to reorient the health care system toward community-based prevention, primary care, and keeping citizens healthy.

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:  
*(max 2500 characters)*

The CASH oral health program is focused to improve the oral health among children, youth, and pregnant women. The MOM van provides dental screening as part of prenatal services. An MOU with DCPS and Chartered Schools will expand oral health services to provide screenings, fluoride treatment and sealants to children and oral health education programs. CASH is also involved in reducing unintended pregnancies and teen births by expanding its sexual health program utilizing the CARRERA model in DCPS and Charter Schools. CASH provides STD screening and prevention services for teens and will implement its highly successful chlamydia and gonorrhea screenings in all DC high schools and Charter Schools. Finally CASH is trying to reduce by 2010 ashtma ED visits by 20% and improve school-based asthma management programs through implementation of QI plans and asthma protocols. CASH in collaboration with the Nutrition and Physical Fitness Bureau is developing initiatives to improve eating behaviors with foods of higher nutritional dietary value and increase the level of physical activity in schools. The Perinatal and Infant Health bureau is working to decrease infant mortality through direct action developed in the DC Infant Mortality Plan (part of the Child Health Action Plan).

b. Population-Based Services:  
*(max 2500 characters)*

CASH is working to decrease violence toward and by children and youth. This priority was not well executed over the last year. However CHA plans to solicit strategies from organizations currently addressing violence toward and by children and youth. Public and private partnership developed a poster campaign that will be distributed to schools. The Lead Program is working to decrease lead poisoning for children under six years of age through home based assessment of children with blood lead levels at or equal to 5ug/DL.

c. Infrastructure Building Services:  
*(max 2500 characters)*

The SHCN Bureau is working to increase access to medical homes and support seamless systems of care. CHA continues to work with the DCPCA and MAA to ensure that children with SHCN services are well-integrated with the Medicaid-SCHIP program. DOH is moving to improve its capacity to collect, acquire, analyze and utilize program data and strengthen surveillance systems. CHA initiated the data integration project that will support the timely and quality collection of disparate data across DOH administrations. A CDC appointee leads CHA's efforts focusing on evaluation, surveillance systems, and infant mortality.

**1. Section Number:** Performance Measure #9

**Field Name:** PM09

**Row Name:**

**Column Name:**

**Year:** 2007

**Field Note:**

This reporting period, 6 District of Columbia Public Schools were targeted to receive oral health services (2 more than last year). These schools met the criteria that at least one-half of the student enrollment were eligible for the free or reduced lunch program. Therefore, the number of eligible students (including those who returned permission slips) and including those who used the service remained low. In addition, the schools served had overall small enrollment numbers for third grade classes. The denominator reflects the number of eligible 3rd graders; the numerator reflects the number 3rd graders who received a sealant.

In 2006 the denominator was the number of all eligible children. This caused the annual indicator to be much lower, and therefore was not used again in this reporting year.

It can be noted that DC's oral health program is expanding to provide services in all grades in participating elementary schools.

**Field Note:**

This is an "estimate" based upon students examined under the auspices of the school-based sealant project, not a population-based estimate. Over a three-year period from 2004 through 2006, 812 second and third graders in 14 schools were screened. The students screened (those for whom parental consent was received) represented 46% of the total enrollment in the 14 participating schools.

**Field Name:** Question1

**Row Name:** #1. Family members participate on advisory committee or task forces...

**Column Name:**

**Year:** 2009

**Field Note:**

Family members, parents, and care givers are heavily recruited for the advisory committee. Time constraints and previous obligations make it a challenge for them to participate. The advisory board and CHA will make an effort to allow them a better chance to participate. CHA in 2008 will fill the vacant seat of parent advocate on the AMCHP advisory board. CHA will also work to involve more youth participation on the advisory board by reaching out to local CSHCN clubs and service organizations.

**FORM 14**  
**LIST OF MCH PRIORITY NEEDS**

*[Sec. 505(a)(5)]*

**STATE: DC FY: 2009**

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Infrastructure Development, Population-based Services, and Direct Services: Improve oral health among children, youth and pregnant women.
2. Enabling Services: Reduce unintended pregnancies and teen births.
3. Enabling Services: Enhance nutrition and increase physical activity for children and youth.
4. Population-based Services: Decrease violence toward and by children and youth.
5. Infrastructure Development and Direct Services: Increase access to medical homes for CSHCN and support seamless systems of care.
6. Infrastructure Development: Improve MPCA capacity to collect, acquire, analyze and utilize program data and strengthen surveillance systems.
7. Direct Services: Provide STD screening and prevention services for adolescents.
8. Enabling Services: Decrease infant mortality.
9. Enabling Services: Improve school-based asthma management of children.
10. Population-Based Services: Decrease lead poisoning for children under six years of age.

**STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET**  
**STATE: DC**

SP #     2    

**PERFORMANCE MEASURE:**

Percent of Medicaid enrolles receiving EPSDT screening

**STATUS:**

Active

**GOAL**

To increase children's participation in and receipt of EPSDT screening services

**DEFINITION**

Participant ratio as defined in 416 report to CMS

**Numerator:**

Number of Medicaid eligible beneficiaries under age 21 who received at least one initial or periodic screening service

**Denominator:**

Number of Medicaid eligible beneficiaries under age 21 who should receive at least one initial or periodic screening service in FY

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

The state Medicaid agency is required to submit the 416 report to CMS annually. The participation ratio reflects adjustments based on EPSDT periodicity schedule.

**SIGNIFICANCE**

Low participation affects opportunities to correct many health problems and thus contributes to prevalence of children with special need.

SP #      3

**PERFORMANCE MEASURE:**

Prevalence of lead levels > 10 ug/dL among children through age 6

**STATUS:**

Active

**GOAL**

To reduce/control effects of exposure to lead and resulting irreversible neurological damage

**DEFINITION**

DC measure reflects recent changes in CDC recommendations re: exposure.

**Numerator:**

Number of children screened in the FY who have at least one positive test result.

**Denominator:**

Number of children screened at least once

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

DC CLPPP lead registry Prevalence estimates are not currently population based. Installation of an automated system will provide data to estimate coverage of testing and excess exposure rates.

**SIGNIFICANCE**

Most DC inner city children are at high risk of exposre due to older housing stock. Exposure may result in irreversible damage.

SP # 4

**PERFORMANCE MEASURE:**

Prevalence of tobacco use among pregnant women

**STATUS:**

Active

**GOAL**

To reduce the adverse effects of tobacco on pregnant women and their fetuses

**DEFINITION**

**Numerator:**

Number of women reported on birth certificates as using tobacco during pregnancy

**Denominator:**

Number of live births in calendar year

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

SCHS - state birth certificate file The birth certificate data on tobacco use probably results in gross under-reporting.

**SIGNIFICANCE**

The adverse effect of tobacco on pregnancy and birth outcomes is well-known.

SP #          6

**PERFORMANCE MEASURE:**

Percent of resident women who give birth with no prenatal care or entry into prenatal care in 3rd trimester

**STATUS:**

Active

**GOAL**

to improve maternal health and birth outcomes

**DEFINITION**

Percent of resident women who give birth with no prenatal care or entry into prenatal care in 3rd trimester

**Numerator:**

number of annual resident births for which birth certificate recorded no prenatal care or entry into prenatal care in 3rd trimester

**Denominator:**

total annual resident births for which trimester of entry is known

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

birth certificate/ birth file. In DC there is a high proportion of missing data for trimester of entry.

**SIGNIFICANCE**

No or late entry prenatal care subjects the mother and infant to an array of adverse outcomes, including HIV infection, drug exposure and maternal and infant death.

SP # 7

**PERFORMANCE MEASURE:**

Incidence of repeat births for teens less than 19 years of age

**STATUS:**

Active

**GOAL**

to reduce the teen birth rate

**DEFINITION**

**Numerator:**

number of annual births to women less than 19 years of age not first birth

**Denominator:**

number of annual births to women less than 19 years of age

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

birth certificates/birth file

**SIGNIFICANCE**

Early child bearing may contribute to poor spacing of pregnancies and multiple pregnancies, which lead to adverse maternal and infant outcomes.

SP # 8

**PERFORMANCE MEASURE:**

Percentage of high school students who were in a physical fight one or more times during the past 12 months

**STATUS:**

Active

**GOAL**

To decrease physical violence toward and by youth

**DEFINITION**

Percentage of high school students who were in a physical fight one or more times during the past 12 months as measured by item on Youth Risk Behavior Survey

**Numerator:**

Estimate provided by CDC DASH based on YRBS results; number of yes responses to questionnaire item

**Denominator:**

Estimate provided by CDC DASH based on YRBS results; weighted number of respondents

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

15-38. Reduce physical fighting among adolescents

**DATA SOURCES AND DATA ISSUES**

YRBS Biennial Survey; out-of-school youth and private school students are not included.

**SIGNIFICANCE**

This is both a national and a DC Healthy People 2010 objectives. It is a priority need for MFHA.

SP #      9

**PERFORMANCE MEASURE:**

Percent of preterm births

**STATUS:**

Active

**GOAL**

to reduce infant mortality and morbidity

**DEFINITION**

obstetrical estimate of gestational age < 37 weeks as recorded on the birth certificate

**Numerator:**

number of live births with estimated gestational age < 37 weeks

**Denominator:**

number of live births

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

16-11 Reduce preterm births

**DATA SOURCES AND DATA ISSUES**

annual birth file NCHS suggests that estimated gestational age data is subject to reliability issues.

**SIGNIFICANCE**

The vast majority of lbw and vlbw births are preterm. Prematurity is the leading cause of those neonatal deaths not associated with birth defects. Reduction in preterm delivery holds the greatest promise for overall reduction in infant illness, disability, and death. Preterm birth is associated with a number of modifiable risk factors, including the use of alcohol, tobacco, or other drugs during pregnancy and low prepregnancy weight or low weight gain during pregnancy. Other important risk factors for preterm birth are vaginal infections and domestic violence.

SO #        1

**OUTCOME MEASURE:**

Rate of confirmed deaths due to SIDS, average for 3-year period

**STATUS:**

Active

**GOAL**

to reduce number of SIDS deaths and, in turn, the IMR

**DEFINITION**

**Numerator:**

number of investigated and confirmed DC resident SIDS deaths. Numerator is number of SIDS deaths in that calendar year.

**Denominator:**

number of live births in calendar year.

**Units:** 1000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

death certificates/death file Coding and diagnoses issues have been discussed in the literature.

**SIGNIFICANCE**

Many SIDS deaths are preventable, and their reduction will affect the postnatal mortality rate in DC.

**HEALTH SYSTEMS CAPACITY MEASURE # 01**

The rate of children hospitalized for asthma (ICD-9 Codes: 493.0 -493.9) per 10,000 children less than five years of age.

	<b>Annual Indicator Data</b>				
	<b>2003</b>	<b>2004</b>	<b>2005</b>	<b>2006</b>	<b>2007</b>

<b>Denominator</b>	33,513	35,029	35,175	35,513	35,513

Check this box if you cannot report the numerator because

1. There are fewer than 5 events over the last year, and
2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

**Field Note:**

CHA has been able to both improve relationships to obtain timely data and increase its capacity to match and link data. Using SSDI funds, CHA has brokered formal and informal agreements on sharing data, procedures for requests for information, and some collaboration among partners. CHA for the first time is using a statistical package Link Plus for matching and linking. This software is a probabilistic record linkage program developed at CDC's Division of Cancer Prevention and Control.

The DC Medicaid program provides CHA with an annual recipient file, but is not always able to provide claims data in a timely fashion.

Data for 2007 is not available at this time.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2006 American Community Survey (ACS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.
