PERFORMANCE MEASURE # 18

Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester.

Annual Objective and Performance Data

	2003	2004	2005	2006	2007
Annual Performance Objective	88	88	90	90	90
Annual Indicator	83.9	84.7	83.2	73.9	73.9
Numerator	9,508	9,615	9,450	8,796	8,796
Denominator	11,337	11,358	11,358	11,898	11,898

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: DE FY: 2009

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Reduce black infant mortality.
2. Improve access to care in Kent and Sussex Counties for all, as well as, improved statewide access to care for all black women.
3. Ensure a medical home and coordinated services to children with special health care needs.
4. Reduce teen births.
5. Reduce preventable diseases in children and adolescents.
6. Reduce preventable injuries to children and adolescents.
7. Improve dental health of children and adolescents.
8. Improve the mental health of children and adolescents through prevention and the assurance of appropriate treatment.
9. Reduce the barriers to delivery of care to pregnant women and women of childbearing years and reduce those risk factors resulting in infant mortality and congenital abnormalities in their infants.
10. Ensure nutrition services to children, adolescents and adults.

STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: DE

SP # 1

PERFORMANCE MEASURE:

Percent of women delivering live-born infants reporting any cigarette smoking during pregnancy

STATUS:

Active

GOAL

To prevent a known risk factor for infant mortality and to reduce respiratory problems for children exposed to second-hand smoke.

DEFINITION

Numerator:

Numerator: Number of women giving birth to live-born infants who report smoking in a calendar year.

Denominator:

Denominator: Total number of women delivering live-born infants in a calendar year

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The data source is Birth Certificate data provided through vital statistics. It is based on what is reported.

SIGNIFICANCE

Infant mortality is higher for smokers. According to the Health People 2000 Review 1997, cigarette smoking accounts for 17 to 26% low birth weight babies. If the mother remains smoking, there are also increased chances for a SIDS death and respiratory problems for their children.

SP # 2

PERFORMANCE MEASURE:

Percent of live births to women who have another birth in less than 18 months

STATUS:

Active

GOAL

To prevent a known risk factor for infant mortality.

DEFINITION

Numerator:

Number of live births within 18 months after giving birth to another child, exclusive of multiple births

Denominator:

Total number of live births to women having another child

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

The source is vital statistics data from the calendar year. Infants born within 4 months after the birth of a sibling were excluded since these were probably multiple births.

SIGNIFICANCE

A study completed by the state's Perinatal Board Scientific Committee determined that if the short interval births are reduced by 50%, 33 infant deaths would be prevented over a five-year period. Originally, a 24-month interval was targeted. However, in December 2000, the Scientific Committee reviewed current data and supporting information and recommended that the state use 18-month intervals between births as a performance measure. This decision corroborates the findings of the Centers for Disease Control and Prevention, which concluded that the wait between birth pregnancy is best between 18 to 23 months.

SP # 3

PERFORMANCE MEASURE:

The percent of extremely low birth weight black infants among all live births to black women

STATUS:

Active

GOAL

To reduce one of the factors that is a cause of infant mortality and morbidity in a population that has high rates.

DEFINITION

Numerator:

The number of all live black births with birth weight less than 1000 grams born in the previous five years

Denominator:

The total number of live black infants born in the previous five years

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Vital Statistics

SIGNIFICANCE

Low birth weight is a known cause of infant mortality and morbidity. The number of extremely low birth weight black births is the leading cause of the disparity between white and black infant deaths in Delaware.

SP # 4

PERFORMANCE MEASURE:

The rate of children under age 1 who die as a result of Sudden Infant Death Syndrome

STATUS:

Active

GOAL

To reduce one of the chief causes of infant mortality in the state

DEFINITION

Numerator:

Number of live infants who die as a result of Sudden Infant Death Syndrome during the previous five years.

Denominator:

SIGNIFICANCE

Current Delaware shows that if 75% of infants were placed on their backs during the years 1990-1994, 28 infants could have been saved.

SP # 5

PERFORMANCE MEASURE:

The percent of youth reporting any use of alcohol in the last 30 days.

STATUS:

Active

GOAL

To decrease the numbers of youth who use alcohol

DEFINITION

Numerator:

Number of youth surveyed who report using alcohol in the last 30 days

Denominator:

All youth answering the Youth Risk Behavior Survey question

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Youth Risk Behavior Survey which is undertaken in the state's public schools

SIGNIFICANCE

The reduction of alcohol use for all is a strategy to reduce AIDS, motor vehicle injuries, unintended pregnancy, and poor pregnancy outcome.

SP # 6

PERFORMANCE MEASURE:

Percent of youth during the last 12 months who feel so sad or hopeless almost every day for two weeks or more in a row that they stopped doing usual activities

STATUS:

Active

GOAL

To decrease the numbers of adolescents who are so depressed that they cannot carry on usual activities

DEFINITION

Numerator:

Number of youth surveyed who report that during the prior 12 months feeling so sad or hopeless almost every day for two weeks or more in a row that they stopped doing usual activities

Denominator:

All youth answering the Youth Risk Behavior Survey question

Units: 100 **Text:** percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Data comes from the Youth Risk Behavior Survey undertaken in the state's public schools. Limitations of the data are that its only undertaken in some of the public schools, private schools are not included, and it is takes place every 2 years rather than yearly.

SIGNIFICANCE

The most recent Title V Needs Assessment identifies Adolescent mental health problems as of great concern. Number of service providers are limited and early detection and prevention opportunities are also limited. This measure is meant to provide a method of tracking depression which leads to suicide and other risk taking behaviors.

SP # 7

PERFORMANCE MEASURE:

The percent of Medicaid children, including children with special health care needs, under age 21 who receive coordinated, ongoing, comprehensive care within a medical home.

STATUS:

Active

GOAL

To increase the number of Medicaid children, including children with special health care needs, under age 21 who have a medical home.

DEFINITION

A medical home is defined according to the AAP criteria.

Numerator:

Number of Medicaid children, including children with special health care needs, in the State age 21 and under who have a medical home during the reporting period.

Denominator:

Total number of Medicaid children, including children with special health care needs, in the State under age 21 during the reporting period.

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

16-22

Care for children with special health care needs should be provided and coordinated through a "medical home" that is accessible, family-centered, continuous, comprehensive, coordinated, compassionate, and culturally competent and linguistically appropriate. Physicians and parents share responsibility for ensuring that children and their families have access to all the medical and nonmedical services needed to help them achieve their maximum potential.

DATA SOURCES AND DATA ISSUES

Medicaid Management Information System (MMIS) University of Delaware Study

SIGNIFICANCE

The most recent statistics from Delaware show an increase in use of 56.9 to 60 of hospital emergency departments, walk-in clinics, and other urgent-care facilities providing primary medical care to Medicaid children.

SP # 8

PERFORMANCE MEASURE:

Hospital discharge rate for children from five through 17 years with asthma

STATUS:

Active

GOAL

To ensure quality health care for children with asthma so that they do not need to be hospitalized

DEFINITION

Numerator:

Number of hospital discharges for asthma diagnosed children from 5 through 17 years

Denominator:

Total number of children 5 through 17 years

Units: 10000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Hospital discharge data This data cannot tell us numbers of actual children, how long they were hospitalized or actual service rendered.

SIGNIFICANCE

According to "Delaware 2000," asthma affects about 28,000 Delawareans based on national prevalence rates. Hospital discharge rates have been increasing rapidly in the child population. If these patients get proper care and are not exposed to hazards such as smoke, they would not need to be hospitalized. Care for this group can also be looked at as indicative of care for children with special health care needs as a whole.

SP # 9

PERFORMANCE MEASURE:

The percent of young adults with special health care needs cared for in Delaware who transition appropriately to adult health and social services when they reach their 18th birthday

STATUS:

Active

GOAL

To increase the number of young adults with special health care needs who transition appropriately to adult health and social services when they reach their 18th birthday.

DEFINITION

Numerator:

Number of young adults with special health care needs who transition appropriately to adult health and social services when they reach their 18th birthday.

Denominator:

Total number of young adults with special health care needs in who reach their 18th birthday in a calendar year.

Units: Text: 0

HEALTHY PEOPLE 2010 OBJECTIVE

16-23

Children with special health care needs and their families often require a range of services. Health services, including preventive and primary care, routine screening for impairments of vision, hearing, speech, and language, and assessment of physical and psychosocial milestones; specialized diagnostic and therapeutic services; and habilitation and rehabilitation services. Transition services are needed to assist in the progression from adolescent health care to adult health and social services

DATA SOURCES AND DATA ISSUES

Hospital Discharge Data A.I. duPont Hospital Client Data SLAITS

SIGNIFICANCE

The SLAITS survey data brought attention to the issue. The approximate number of CSHCN in Delaware is 30,653, which is around 15% of the 0-18 age range. According to the survey the Success Factor for addressing the Core Outcome Measure #6 "All youth with special health care needs will receive the services necessary to make appropriate transitions to all aspects of adult life, including adult health care, work, and independence" was 7.0%. Only 53.8 % of the doctors have talked about the changing needs as the child becomes an adult. 60.9% of the children have a plan for addressing the changing needs. 49.9% of the doctors had discussed the shift to an adult provider. And a disappointing 19.7% of the children had received guidance and support in the transition to adulthood. There are over 500 young adults with special needs turning 18 that are discharged from the A.I. duPont Hospital for Children annually.

SP # 10

PERFORMANCE MEASURE:

Decrease the rate of deaths from 33 to 30 to children ages 14 years through age 21 caused by motor vehicle crashes.

STATUS:

Active

GOAL

To reduce the number of deaths to children ages 14 years to 21 years caused by motor vehicle crashes.

DEFINITION

Numerator:

Number of deaths to children aged 14 years to 21 years caused by motor vehicle crashes. This includes all occupant, pedestrian, motorcycle, bicycle, etc. deaths caused by motor vehicles.

Denominator:

All children in the State aged 14 years to 21 years. (Five year average, per 100,000)

Units: Text: 0

HEALTHY PEOPLE 2010 OBJECTIVE

15-15

Motor vehicle crashes are often predictable and preventable. Increased use of safety belts and reductions in driving while impaired are two of the most effective means to reduce the risk of death and serious injury of occupants in motor vehicle crashes. Death rates associated with motor vehicle-traffic injuries are highest in the age group 15 to 24 years. In 1996, teenagers accounted for only 10 percent of the U.S. population but 15 percent of the deaths from motor vehicle crashes. Those age

Death rates associated with motor vehicle-traffic injuries are highest in the age group 15 to 24 years.

DATA SOURCES AND DATA ISSUES

Department of Emergency Services for Children Fatal Accident Reporting System Delaware Department of Transportation Vital Statistics

SIGNIFICANCE

About 56 % of all deaths to children aged 14 years to 21 years in Delaware are due to injuries, and around 80% of these are from motor vehicle crashes. The most recent statistics from Delaware show an increase from 24 deaths in 2002 to 38 deaths in 2003 in motor vehicle deaths involving children ages 14 years through age 21. Injuries are the leading cause of mortality in this age group and they are the most significant health problems affecting the State's children.
