[SEC. 506(A)(1)]
STATE: GA

1. State MCH Administration:
(max 2500 characters)

The Office of Birth Outcomes (OBO), part of the Division of Public Health, Department of Human Resources is Georgia's Title V agency. The charge of OBO is promoting the health of the State's mothers and infants, women of childbearing age, children, adolescents, and children with special health care needs. OBO works toward: 1) early and comprehensive health services to women of childbearing age and their infants in an environment that fosters personal dignity; 2) timely and comprehensive health services to children which promote optimal attainment of their individual abilities; and 3) comprehensive health services to adolescents in an environment that fosters personal responsibility, encourages independence, and promotes positive behaviors. To carry out these responsibilities, OBO is involved in policy and planning activities, oversees the operations of various MCH programs in local health departments and other organizations, and provides technical assistance and training.

b. Infants < 1 year old	145,632
c. Children 1 to 22 years old	372,543
d. CSHCN	13,074
e. Others	0

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:
(max 2500 characters)

Universal screening and assessment: OBO continues to coordinate the Children 1st system and has developed integrated intake and assessment tools for all OBO programs. Care Coordination: All children enrolled in Title V CSHCN program, Children's Medical Service (CMS) receive comprehensive care coordination using the CaCoon Model, which includes the Transition to Adulthood Plan for youth. Home visiting for high-risk families is also planned with MHDDAD and DFCS using a systems analysis approach.

b. Population-Based Services:
(max 2500 characters)

Nutrition health education: OBO continues to implement population-based nutrition services through coordination with all of OBO population teams. Partnerships have been developed to address emerging health issues such as obesity, breastfeeding, and physical inactivity. Oral Health: OBO provides school-linked dental prevention programs targeting high-risk elementary school children. Services include fluoride rinse, dental sealants, prevention education and treatment services and provision of water fluoridation and monitoring for community water systems. Newborn Hearing Screening: Maintains and supports a comprehensive, coordinated, statewide system to ensure that all newborns are screened for hearing loss prior to hospital discharge. Newborn Metabolic Screening: screens for 29 disorders (including cystic fibrosis). Screening, follow-up, diagnosis, management and evaluation for 29 disorders (including newborn hearing screenings) will identify an estimated 136 newborns yearly.

c. Infrastructure Building Services:
(max 2500 characters)

Organizational development: OBO is incorporating Balanced Scorecard and other program management strategies to increase effectiveness and improve coordination of services. SendSS (State Electronic Notifiable Disease Surveillance System): Georgia's state-of-the-art web-based reporting system, SendSS, will support Children 1st, UNHSI, Lead Poisoning and Prevention Program, Birth Defects Reporting and Information System, and the Genetics Program. SendSS will serve as the information backbone for Children 1st, providing a data repository for ensuring all children and families receive appropriate screenings, referral, and follow up services to which they are entitled. In February 2007, DPH began developing the system using an in-house team of JAVA/Oracle developers. The first phase includes a metabolic/genetic module, newborn hearing screening and follow up, and the Children 1st module. It interfaces with the Vital Events Information System Electronic Birth Registry (EBRS). Full rollout to the health districts and counties is expected to occur starting in July 2007 and will continue until all districts are trained to use the system. Rollout to hospitals, audiologists, and pediatricians will be implemented through a joint effort with district public health liaisons and Children 1st coordinators. Phase 2 development includes the birth defects module and lead surveillance and follow up. Future plans to expand the system to include other child health modules are underway. Maternal Mortality Review (MMR): MCH Epi and OBO staff serve on a quarterly statewide maternal mortality multi-disciplinary review committee. OBO staff review medical records and write a case summary for each case. Summaries are presented to the MMR committee, cases are discussed, and a decision is reached as to if the death was potentially preventable or not. Recommendations are made to improve the surveillance system and what can be done to prevent future deaths. Approximately 25 maternal deaths are reviewed annually. Fetal and Infant Mortality Reviews (FIMR): The state has initiated support for a FIMR in two sites, Chatham and Richmond counties, based on fetio-infant mortality rate and number of infant deaths. Current and planned activities include participation in the national FIMR conference, purchase and adaptation of FIMR software, and development of evaluation plans.

The Data comes from the National Immunizations Survey (NIS); numerator and denominator would not be meaningful since this is survey data.

PERFORMANCE MEASURE # 01

The percent of screen positive newborns who received timely follow up to definitive diagnosis and clinical management for condition(s) mandated by their State-sponsored newborn screening programs.

- Section Number:** Performance Measure #9

Field Name: PM09

Row Name:

Column Name:

Year: 2006

Field Note:

The 2005 original data report showed 19,353 sealant participants. Upon development of a new database with clean data, the totals for the years 2001-2005 dropped significantly. There were many double entries for data in the clinical and prevention records in the old database. The new design eliminates the opportunities for errors.

The districts that were entering data incorrectly have recieved additional training on how to use the old db, until the new one can be implemented statewide.

GOAL

To improve oral health among children in Georgia.

DEFINITION

Numerator:

The number of children enrolled in Medicaid (less than 21 years of age) or Peachcare (less than 19 years of age) who receive a preventive dental service.

Denominator:

The total number of children enrolled in Medicaid (less than 21 years of age) or Peachcare (less than 19 years of age).

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 21-12

Increase the proportion of low-income children and adolescents who received any preventive dental service during the past year.

DATA SOURCES AND DATA ISSUES

Medicaid and Peachcare (S-CHIP) billing data.

SIGNIFICANCE

Access to preventive dental health services is a significant factor in overall oral health. Even with dental coverage through Medicaid and Peachcare, low-income children are less likely than their higher income counterparts to receive preventive dental health services.

SP # 5

PERFORMANCE MEASURE:

Percent of women of reproductive age who consume at least 400mcg of folic acid daily

STATUS:

GOAL

Reduce the occurrence of spina bifida and other neural tube defects in Georgia.

DEFINITION

Percent of women of reproductive age (18-44) who report that they take a supplement containing at least 400mcg of folic acid daily.

Numerator:

Number of women ages 18-44 surveyed who report taking a multivitamin or other supplement with 400mcg of folic acid daily.

Denominator:

Total number of women ages 18-44 surveyed.

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 16-16

Increase the proportion of pregnancies begun with an optimum folic acid level

Objective 16-15

Reduce the occurrence of spina bifida and other neural tube defects.

DATA SOURCES AND DATA ISSUES

Behavioral Risk Factor Surveillance System (BRFSS). The folic acid optional module will only be included in the GA BRFSS every other year or every third year.

SIGNIFICANCE

Approximately 50% of pregnancies affected with NTDs may be prevented with adequate consumption of folic acid from 1 month before conception through the first 3 months of pregnancy.

SP # 6

PERFORMANCE MEASURE:

Percent of repeat births among adolescents aged 15-17-years-old

STATUS:

Active

GOAL

To reduce repeat births among Georgia's adolescents aged 15-17-years-old.

DEFINITION

Percent of repeat births to adolescents aged 15 to 17 years old out of total births to 15-17 year olds.

Numerator:

Number of repeat births to females ages 15 to 17.

Denominator:

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 9-7

Reduce pregnancies among adolescent females.

DATA SOURCES AND DATA ISSUES

Georgia Vital Statistics.

SIGNIFICANCE

The teenage pregnancy rate in Georgia is among the highest in the country. Most teen pregnancies are not planned and occur outside marriage. Especially among younger teens, teen pregnancy is considered a public health and societal problem. One of the focus areas for Georgia pregnancy prevention programs is to reduce the rate of repeat births among adolescents.

SP # 7

PERFORMANCE MEASURE:

Rate of SIDS among African American infants.

STATUS:

Active

GOAL

To reduce the racial disparity in Georgia due to infant mortality and SIDS.

DEFINITION

SIDS refers to the sudden death of a child under 1 year of age that remains unexplained even after a thorough case investigation.

Numerator:

The number of infant deaths among African Americans due to SIDS.

Denominator:

The total number of live births among African Americans.

Units: 1000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 16-1h
Reduce deaths from sudden infant death syndrome (SIDS).

DATA SOURCES AND DATA ISSUES

Georgia vital statistics.

SIGNIFICANCE

SIDS is the leading cause of death during the postneonatal period (29 to 365 days). African American infants are twice as likely to die of SIDS in Georgia as white infants.

SP # 8

PERFORMANCE MEASURE:

Percentage of Medicaid children who have had a developmental screening

STATUS:

Active

GOAL

To improve early detection of delays in children and improve child health and well-being for identified children.

DEFINITION

Measure under development.

Numerator:

Denominator:

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

To be determined

SIGNIFICANCE

Many children with behavioral or developmental disabilities are missing vital opportunities for early detection and intervention. The American Academy of Pediatrics (AAP) and the American Academy of Neurology recommend that all infants and young children be screened for developmental delays periodically in the context of office-based primary care.

PERFORMANCE MEASURE:

Numerator:

Number of Public Health staff that have completed the Public Health 101 course.

Denominator:

Total number of Public Health staff.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

Objective 23-11

Increase the proportion of State and local public health agencies that meet national performance standards for essential public health services.

Objective 23-8

Increase the proportion of Federal, Tribal, State, and local agencies that incorporate specific competencies in the essential public health services into personnel systems.

DATA SOURCES AND DATA ISSUES

Data from the Office of Training and Workforce Development.

SIGNIFICANCE

Numerator:

The total combined score of the seven five-point Likert scale questions.

Denominator:

The total combined points possible of the seven five-point Likert scale questions.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

16-23

Increase the proportion of Territories and States that have service systems for children with special health care needs.

DATA SOURCES AND DATA ISSUES

A scoring sheet based on a qualitative assessment by key stakeholders of the ECCS initiative using seven five-point Likert scale questions.

SIGNIFICANCE

The improvement of MCH outcomes requires a system-oriented partnership-based approach that incorporates infrastructure, population-based services, enabling services, and direct services. Traditionally, local health departments provided clinical services dependent on categorical funding. As a broader responsibility for casting public health around the three core functions (policy development, assessment, and assurance) has emerged, the role partnerships and collaboration in the design and implementation of a total cohort service delivery system has become critical. An effective collaborative plan needs to engage a broad array of stakeholders, community partners, and consumers.

SO # 1
