- 1. Section Number:** I. Federal-State MCH Block Grant Partnership
Field Name: PregWomenBudgeted
Row Name: Pregnant Women
Column Name: Budgeted
Year: 2007
Field Note:
IDHS has budgeted \$716,400 less for pregnant women in FFY'07 than FFY'06. This is largely due to reallocating the budget for the All Our Kids Assurance Networks from the budget for pregnant women to the budget for infants (a more appropriate classification).

Field Name: Children_0_1Budgeted
Row Name: Infants <1 year old
Column Name: Budgeted
Year: 2007
Field Note:
IDHS has budgeted \$4.8 million less for infants in FFY'07. This is largely the result of changing the amount and allocation of state Early Intervention program funds for FFY'07. In FFY'06, \$13 million of state Early Intervention funds were allocated as enabling services for infants. In FFY'07, all \$61 million of state Early Intervention funds have been included in the Partnership; they were allocated across services for infants and older children on Form 4, based on the age distribution of the program's caseload. The reallocation reduced to \$8 million the amount of these funds allocated to services for infants.

Field Name: PregWomen_None
Row Name: Pregnant Women
Column Name: None %
Year: 2009
Field Note:
Source: The method of using the most recent CPS percentage has changed for prenatal women due to the proportion of Medicaid which is known because of Cornerstone. Also there are no other estimates from Healthcare and Family Services to alter the proportions as done in the methods for reporting Medicaid and SCHIP for Infants and Children. Therefore, the estimate for prenatal women at 6.8% is actually more in line with 5.9% CPS for Infants.

MCH Helpline staff answer three '800' lines: 800-323-4769 (GROW); 800-545-2200 (MCH) and 800-843-6154 (DHS CHP Customer Service Line). The staff of 3 field about 4,000 calls per month, including calls in Spanish. The MCH 800 line receives general calls about maternal and child health issues. The newly automated GROW 800 line will receive calls strictly for WIC and Early Intervention. The DHS 800 line receives calls about health issues outside of these programs under DHS.

2. Section Number: Main

Field Name: calls_2

Row Name: Number of calls received On the State MCH Hotline This reporting period

Column Name: FY

Year: 2007

Field Note:

The number of calls to the Helpline dropped from FY 2006 due in part to a restructuring of the overall DHS Helpline system. Further, an automated system was being put into place during this time and the enhancements continued into FY 2008. The number of calls increased dramatically in FY 2008 to 66,541 due in part to these changes.

TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT
STATE PROFILE FOR FY 2009
[SEC. 506(A)(1)]
STATE: IL

1. State MCH Administration:
(max 2500 characters)

The Illinois Department of Human Services (IDHS) administers the Maternal and Child Health Services Block Grant. IDHS uses these funds to provide preventive and primary care services to women, infants, children and adolescents throughout the state. IDHS transfers 30% of the Block Grant funds to the University of Illinois at Chicago Division of Specialized Care for Children (DSCC) to operate the state's program for children with special health care needs. IDHS also transfers some Block Grant funds to the Illinois Department of Public Health (IDPH) to administer population-based services for pregnant women, infants and children, including perinatal care, metabolic and hearing screening of newborns, oral health services, screening for lead poisoning and vision and hearing screening of older children.

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:
(max 2500 characters)

Illinois' statewide initiatives and partnerships for direct health care and enabling services include the following: the Integration of WIC and Family Case Management, which has substantially improved pregnancy outcomes among low-income women; HealthWorks of Illinois, a unique health care system for children in state custody; Teen Pregnancy Prevention, which has contributed to the reduction in the teen fertility rates through an array of primary and secondary prevention services; CSHCN Care Coordination Services for children with physical disabilities as well as children who are technology-dependent.

b. Population-Based Services:
(max 2500 characters)

Illinois' statewide initiatives and partnerships for population-based services include the following: the Universal Newborn Hearing Screening program, which ensures that every newborn in Illinois is screened for hearing loss and that those suspected of hearing loss receive appropriate diagnostic testing and intervention before six months of age; the Newborn Metabolic Screening program, which ensures that every newborn in Illinois is screened for more than 30 metabolic diseases, and that infants with suspected of having a disorder receive appropriate diagnostic testing and follow-up; and the Perinatal Care program, which ensures coordination of perinatal care services among regional hospital networks so that women and infants receive risk-appropriate care.

c. Infrastructure Building Services:
(max 2500 characters)

Illinois' statewide initiatives and partnerships to strengthen the service delivery infrastructure include: collaboration with the Illinois Department of Healthcare and Family Services to promote enrollment in All Kids, to support implementation of Primary Care Case Management and Disease Management and to support implementation of Illinois Healthy Women; Healthy Child Care Illinois, a network of Child Care Nurse Consultants who provide training, consultation and technical assistance to child care providers throughout the state; Collaborative Initiatives for CSHCN, including benefits management technical assistance, participation on the Interagency Coordinating Council on Transition, and publishing the family newsletter Special Addition; other CSHCN education and training, including the Internet-based continuing education program on the "Medical Home" concept, developed with state pediatric and family practice associations; providing quality improvement technical assistance to primary care practices; and developing a training initiative for primary care providers on newborn hearing screening; the All Our Kids Assurance Networks, to improve the service system for infants and toddlers.

TRACKING PERFORMANCE MEASURES
[SECS 485 (2)(2)(B)(III) AND 486 (A)(2)(A)(III)]
STATE: IL

Form Level Notes for Form 11

Illinois' Vital Records Registrar has not released birth statistics for 2007. Consequently, DHS could not update some TVIS forms or give more current annual narrative reports of its performance measures pertaining to 2007 births.

PERFORMANCE MEASURE # 01

The percent of screen positive newborns who received timely follow up to definitive diagnosis and clinical management for condition(s) mandated by their State-sponsored newborn screening programs.

	Annual Objective and Performance Data				
	2003	2004	2005	2006	2007
Annual Performance Objective	98	99.5	99.9	99.6	99.7
Annual Indicator	99.5	99.9	99.9	99.8	99.2
Numerator	182,979	181,975	178,700	176,890	175,837
Denominator	183,899	182,158	178,872	177,234	177,234

Check this box if you cannot report the numerator because
 1. There are fewer than 5 events over the last year, and
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

Field Note:

The denominator is the final number of occurrent births in 2005. The numerator has been extrapolated to provide the same rate as the provisional as reported the year before. Each year the prior year's denominator is revised when the final number of occurrent births is available from the Illinois Department of Public Health.

PERFORMANCE MEASURE # 02

The percent of children with special health care needs age 0 to 18 years whose families partner in decision making at all levels and are satisfied with the services they receive. (CSHCN survey)

Field Note:

Estimated Vaccination Coverage with 4:3:1:3 Among Children 19-35 Months of Age - National Immunization Survey. Provisional data during preparation of this application is available for Q3-Q2. This report does not provide a numerator or denominator. The data are derived from a telephone interview of approximately 400 individuals.

The trend appears to be decreasing. However, the Confidence Interval for the percent coverage with 4:3:1:3 is +/- 6.8 suggesting that the decrease is not statistically significant. (2007 data caused a "Data Alert" or a departure from past performance with administering these immunization series.)

Field Level Notes

1. Section Number: Performance Measure #9

Field Name: PM09

Row Name:

Column Name:

Year: 2007

Field Note:

According to the IDPH, Oral Health program, the next oral health state level 3rd grade survey is planned for 2008-09. The 2004 through 2007 percentage is from its 2003-04 oral health survey results. Every year the MCH program has extrapolated this percentage to the statewide population of 3rd grade students located at the Illinois State Board of Education's website. Since the percentage has not changed, the MCH program is reporting last year's numerator and denominator.

The annual performance objectives for 2008-2012 have been adjusted one percent to correct a 'data alert' stating the state has already surpassed subsequent year's objectives. This has been true since 2005. It is possible in the future that Illinois will have a more positive method of reporting these data as a state instead of relying on the data collection of a very small underresourced public health program.

1. Section Number: Performance Measure #11

Field Name: PM11

Row Name:

Column Name:

Year: 2007

Field Note:

The Numerator is infants Still Breastfed at 6 Months. The Denominator is infants Ever Breastfed. Source: Count and Percent of WIC Breastfed Infants, SFY 2007 Annual Report, CHP, IDHS. According to the Breastfeeding Report Card, United States 2007: Outcome Indicators (which reports WIC and Other data) the Illinois' percent at 'breastfed at 6 months' was 40.9.

The downward trend is due to stricter edits or quality assurances measures added to the client information system. Previously, WIC service providers reported breast feeding at the first assessment (newborn) and did not update that information upon subsequent visits. The information system now requires an update with every certification/assessment visit. The reported information more accurately reflects breast feeding behavior at six months than in previous years.

This is a new performance measure for reporting year 2005. The Numerator is infants Still Breastfed at 6 Months. The Denominator is infants Ever Breastfed. Source: Count and Percent of WIC Breastfed Infants. The Ross survey data also tracks state performance for this measure. Illinois has tracked this information for some time and the proportion of WIC participants who continue breastfeeding for six months has increased from 11.4 percent in 1992 to 23.0 percent 10 years later. Field Note:

Source: Illinois Cornerstone, IDHS, 3-31-06. There are 19,718 WIC children at or above the 85th percentile, indicating that 24 percent of WIC 2-5 year olds are at risk of overweight or already overweight.

PedNSS data from 2004 indicated that 30.1 percent of 88,898 children were at or above the 85th percentile, comparable to the national PedNSS data from 2003 that indicated 30.4% of 2,044,705 children between 2 and 5 years-of-age receiving WIC services were at or above the 85th percentile.

CDC generates PedNSS data from the height and weight entered rather than an assessment question in Illinois Cornerstone. Cornerstone reports are more timely and accessible and very comparable to PedNSS results.

The 2000 Census estimate provided by the Genetics Program was not reported until 2001 and will be continually used for this measure.

A change in data collection procedures resulted in a reduction in this performance measure. A data audit determined that in the past, service providers reported the number of individuals screened rather than the number referred for a genetic condition or concern. Guidelines were refined in an effort to capture the number of clients actually referred rather than merely screened. The performance target was lowered to 1.0 percent to reflect this change in practice. And, although, the performance target was met, the goal was not.

LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: IL FY: 2009

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Reduce racial disparities in infant mortality
2. Reduce the rate of unintended pregnancy
3. Reduce the incidence of sexually transmitted infections, including HIV
4. Reduce adolescent risk-taking behavior and racial and ethnic disparities in teen births
5. Promote health growth and development of children
6. Improve access to preventive and primary health care services
7. Improve access to mental health services
8. Improve access for CSHCN to quality health care through Medical Homes
9. Improve access for YSHCN to transition services
10. Improve linkages to needed services for CSHCN eligible for SSI

FORM 16
STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: IL

SP # 1

PERFORMANCE MEASURE:

The incidence of maltreatment of children younger than age 18

STATUS:

Active

GOAL

To reduce the number of children under 18 years of age who are victims of child abuse and neglect.

DEFINITION

"Indicated" means credible evidence was gathered which would cause a reasonable person to believe a child was abused or neglected.

Numerator:

The number of indicated child victims under 18 years of age.

Denominator:

The number of children under 18 years of age.

Units: 1000 **Text:** 2

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Annual Report published by the Illinois Department of Children and Family Services. The denominator is obtained from the 2000 U.S. Census.

SIGNIFICANCE

Child abuse threatens the health of many children. Violent and abusive behaviors have been increasingly recognized as an important public health problem. Illinois' current child abuse rate is well below the Healthy People 2000 objective level. This is a critical measure for the State that will continue to receive attention.

SP # 2

PERFORMANCE MEASURE:

The proportion of CSHCN ages 14 and above and their parents who receive comprehensive transition planning services to promote awareness of adult services

STATUS:

Active

GOAL

Provide comprehensive transition planning for CSHCN ages 14 and above and their parents

DEFINITION

Staff will develop and test comprehensive transition planning materials. Upon training of staff, comprehensive transition planning will be implemented statewide for CSHCN for ages 14 and above who are interested in this training.

Numerator:

Number of CSHCN ages 14 and above and parents who receive comprehensive transition planning with local care coordinators for the reporting year

Denominator:

Number of CSHCN ages 14-21 served throughout the state

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Children's Health Management Information System, Special Report

SIGNIFICANCE

Based on the 1990 Transition Survey of DSCC clients and 1996 Client Survey, approximately 50% of those CSHCN and their families surveyed expressed a need for assistance in transition planning to adult services. DSCC staff believe that increased knowledge about specific transition services would enable them to better assist CSHCN plan for adult life. Students eligible for services under Part B of IDEA receive transition services. Not all CSHCN are eligible for Part B services but would benefit from transition planning to prepare for adult services, particularly health care. Families want to know how to obtain and pay for medical care when a child transitions to adult services as well as options for independent living, recreation and socialization. A comprehensive, coordinated effort is needed to assist families of CSHCN be better prepared for adult life.

SP # 3

PERFORMANCE MEASURE:

The proportion of women and children up to 22 years of age who receive appropriate genetic testing, counseling, education and follow-up services

STATUS:

Active

GOAL

By 2000, increase the proportion of women and children up to 22 years of age who receive appropriate genetic testing, counseling, education and follow-up services to 5% of the population of women of childbearing age and children in the state.

DEFINITION

Clinical genetic centers will be given grants to provide genetic testing, diagnosis, counseling, treatment and long range management to families who have a genetic concern. Local health departments will be given grants to offer accessible services for the target population and to provide tracking, education, referral, and follow-up services to families in need. Pediatric hematologists will be given grants to provide diagnostic testing, genetic counseling and medical care to infants and children with a sickling hemoglobinopathy or trait.

Numerator:

The number of women of child-bearing age and children up to age 22 who received appropriate genetic testing, counseling, education and follow-up services.

Denominator:

The total number of women of child-bearing age (13-44) and the total number of children up to age 22 years in the state.

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

DATA SOURCES AND DATA ISSUES

Genetic Grant Quarterly Reports and 2000 Census Data

SIGNIFICANCE

New discoveries are rapidly changing traditional medicine. Clinical genetics is becoming one of the most important preventive treatment modalities of the future. Preconception/prenatal genetic counseling, prenatal testing, newborn screening, and early diagnosis can help prevent premature death, excessive morbidity, mental retardation, and other developmental disabilities; and at the same time, increase the quality of life of those with a genetic disorder. An estimated 50-60% of first trimester miscarriages and 7% of stillbirths and neonatal deaths are due to a chromosome abnormality. Annually, more than 5,000 infants are born with a major birth defect and over 30% of pediatric hospitalizations are due to a genetic disease. As genetic components of more disorders are identified through work completed on the Human Genome Project, these rates will continue to increase.

SP # 4

PERFORMANCE MEASURE:

The prevalence of Early Childhood Caries (ECC)

STATUS:

Active

GOAL

To reduce prevalence of Early Childhood Caries

DEFINITION

The proportion children in Head Start with dental caries

Numerator:

Proportion of children in Head Start with dental caries

Denominator:

Children in Head Start

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

21-1, Early Childhood Caries

Reduce the proportion of young children with dental caries experience in their primary teeth.

DATA SOURCES AND DATA ISSUES

Performance had been estimated from a survey of children participating in the WIC program in past years. In 2008 the source has been changed to proportion of Head Start children. IDPH provides the percentage only to the MCH program. Reporting the Annual Indicator only is acceptable in TVIS.

SIGNIFICANCE

ECC/BBTD is a severe form of dental caries that can lead to the destruction of primary teeth. It is frequently caused by prolonged use of nursing bottles containing anything but water. Continual use of a sweetened pacifier and/or breast-feeding at will throughout the night can also cause ECC/BBTD. This form of disease is preventable with appropriate educational interventions. Prevalence in Illinois ranges from 11% to 15% with close to 73% of all children surveyed needing immediate dental care.

SP # 5

PERFORMANCE MEASURE:

The prevalence of childhood lead poisoning

STATUS:

Active

GOAL

To reduce the prevalence of childhood lead poisoning.

DEFINITION

The definition of lead poisoning is a confirmed blood lead level of 10 mcg/dL and above. The prevalence rate is determined by dividing the number of children with blood lead levels of 10 mcg/dL and above by the total number of children tested for lead poisoning during a time period.

Numerator:

The number of children with blood lead levels \geq 10 mcg/dL.

Denominator:

The total number of children tested during a time period.

Units: 100 **Text:** 1

HEALTHY PEOPLE 2010 OBJECTIVE

Environmental Health 5-13, 11.

Reduce the prevalence of blood lead levels exceeding 10 μ g/dL to 0 in children aged 1-5.

DATA SOURCES AND DATA ISSUES

Data used comes from the IL Lead Poisoning Program data base. Approximately half of the data is transferred from the State Lab where specimens are analyzed. The remainder comes from private labs who are mandated reporters, however there is no enforcement mechanism. Therefore, collection of data from private labs may be incomplete.

SIGNIFICANCE

Young children and the developing fetus, particularly, are at risk for lead poisoning. It damages the body internally and negatively affects the formation of red blood cells. Very high levels of lead can cause seizures, coma and death. If a child has been exposed to high levels of lead, he or she may suffer severe mental retardation. Even at lower levels of exposure, a child can suffer from developmental delay, lower IQ, hyperactivity, learning disabilities, behavioral problems, impaired hearing and stunted growth. Compounding the problem of lead poisoning is the fact that children who have elevated blood lead levels early in their lives may have no symptoms, which means that parents can be unaware of the condition.

SP # 6

PERFORMANCE MEASURE:

The rate of unintended pregnancy

STATUS:

Active

GOAL

To decrease the number of mistimed or unwanted pregnancies

DEFINITION

The final measure is the proportion of unintended live births from the Pregnancy Risk Assessment Monitoring Systems (PRAMS) survey of Illinois. 2002 Baseline: 42.9 percent

Numerator:

The number of women who indicated that their recent pregnancy was mistimed or unwanted, estimated from the PRAMS survey.

Denominator:

The number of women who gave birth, estimated from the PRAMS survey.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

Reproductive Health: 1.3f. Unintended Pregnancy (females aged 15 - 44 years)

HP2010 Goal: 30.0 percent. The national HP2010 goal is based on the National Survey of Family Growth (NSFG)

DATA SOURCES AND DATA ISSUES

Illinois PRAMS Survey

SIGNIFICANCE

Using PRAMS data, Illinois's unintended pregnancy rate at birth is among the highest in the nation. At least one half of all infants born are unintended. Many of these births result in adverse health outcomes which include prenatal mothers who are less likely to seek prenatal care, less likely to breastfeed, more likely to smoke or use alcohol, more likely to have a low birth weight infant and are at risk for abuse. Approximately 50% of unintended pregnancies are terminated by abortion. As a response, the WIC, FCM, School-based Health Clinics and the Family Planning programs provide screening, counseling and education to this population. Specifically, the Family Planning program is using the demographic profile of high-risk clients who are most likely to experience a pregnancy while taking contra captives to better target effective methods, address side effects, and stress consistency of use. Dissemination of information to public health partners who are addressing unintended pregnancy in the state is underway.

SP # 9

PERFORMANCE MEASURE:

The proportion of children under 36 months of age in WIC or FCM who have received at least one developmental screening test in the previous 12 months

STATUS:

Active

GOAL

To increase the proportion of young low-income children receiving complete services during their well child visits.

DEFINITION

The WIC or FCM measure of children receiving one developmental screening is at 12, 24 and 36 months of age. Measuring the proportion of children less than 36 months includes the total of children ages 12 to 36 months of age in WIC or FCM who have received a developmental screening test within the previous 12 months. The annual range is from April to April. 2004 IL Baseline: 60.0 percent

Numerator:

The number of children aged 12 to 36 months of age in WIC or FCM who have had one developmental screening test within the previous 12 months

Denominator:

The number of children aged 12 to 36 months of age in WIC or FCM

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

None

There are no objectives or related objectives defined in HP2010. 2010 Illinois IDHS Goal: 80.0 percent

Further, there are no measures, targets or goals relating to the proportion of low-income children receiving one developmental screening that can be found in policies or procedures of EPSDT, the American Academy of Pediatrics, the Community Mental Health Services Block Grant program or found in those federal programs that mandate screening and mental health services (Head Start, Early Head Start, Title 1 and the Child Care and Development Block Grant program).

DATA SOURCES AND DATA ISSUES

WIC and FCM participant state data

SIGNIFICANCE

Three federal programs (Medicaid, SCHIP and MCH) providing health insurance also provide opportunities for identification of low-income children with developmental problems or conditions. Progress toward this goal will also show an increased proportion of these children referred to the Early Intervention Program among the general population of children less than 3 years of age.

SP # 10

PERFORMANCE MEASURE:

Females 15 to 24 years of age receiving services at Title X family planning clinics tested at least once for chlamydia

STATUS:

Active

GOAL

To reach and treat a greater proportion of the population at risk for chlamydia infections

DEFINITION

In that young females served in family planning clinics represent the largest proportion of the STD testing/treatment program, this group represents the target population.

Numerator:

The number of females aged 15 to 24 who have been tested once for chlamydia at family planning clinics.

Denominator:

The number of females aged 15 to 24 who are being served at family planning clinics.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

25-1a. Females aged 15 to 24 years attending family planning clinics

The measure is not directly related to the HP2010 Objectives. It was developed to measure the performance of local family planning clinics in the State.

DATA SOURCES AND DATA ISSUES

STD Section, IDPH, FPAR The STD Section measures the percent of positive tests for both chlamydia and gonorrhea at more than a dozen different types of clinics and centers.

SIGNIFICANCE

To identify the number of women aged 15 to 24 infected with chlamydia and provide treatment to help in the reduction of incidence.

STATE: IL

HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)
(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
ANNUAL DATA LINKAGES		
Annual linkage of infant birth and infant death certificates	2	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	3	Yes
Annual linkage of birth certificates and WIC eligibility files	3	Yes
Annual linkage of birth certificates and newborn screening files	1	No
REGISTRIES AND SURVEYS		
Hospital discharge survey for at least 90% of in-State discharges	3	No
Annual birth defects surveillance system	3	Yes
Survey of recent mothers at least every two years (like PRAMS)	3	No

*Where:
1 = No, the MCH agency does not have this ability.
2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.
3 = Yes, the MCH agency always has this ability.

FORM 19
HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM
STATE: IL

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	2	No
Other: Youth Tobacco Survey	3	No
Illinois Youth Survey	3	Yes

*Where:

1 = No

2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.

3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

Denominator	<u>182,393</u>	<u>180,665</u>	<u>178,872</u>	<u>180,503</u>	<u></u>

Check this box if you cannot report the numerator because
1. There are fewer than 5 events over the last year, and
2. The average number of events over the last 3 years is fewer
than 5 and therefore a 3-year moving average cannot be
applied.

FORM NOTES FOR FORM 21

HSI 07A/B -- No. of Births by Age. Illinois is reporting 2006 births in this 2009 Application.

HSI 08A/B -- No. of Deaths by Age. Illinois is reporting 2005 deaths in this 2009 Application. As a first priority, IDPH has improved its accuracy of reporting deaths through its electronic death reporting system. Unfortunately none of the requested data by age groups, race/ethnicity have become available before submission of this application and cannot be reported on the TVIS form. In particular note the following data available at the IDPH website:

2006 Illinois Deaths:

Ages 1-4, All Races, All Causes: 174

Motor Vehicle Accidents: 15

Ages 5-14, All Races, All Causes: 218

Motor Vehicle Accidents: 34

Ages 15-24, All Races, All Causes: 1,319

Intentional Suicide: 130

Motor Vehicle Accidents: 330

HSI 10 -- Source: 2006 population estimates, US Census Bureau. The Rural Urban Continuum Codes last release was 2003. The developers of the codes describe their methods as follows and have been used for the reporting Form 21 demographics at the geo level.

The primary source of data for building rural definitions and the associated socioeconomic indicators was Census Summary File 3. Specifically, we used summary level 85.

Summary level 85 gives census data for the intersection of States-Counties-Places/Remainder-Tract-

Urban/Rural. We needed to use summary level 85 in order to identify the portions of Census Places that were also part of Urban Areas.

In the case of the Census Place-based definitions, Census Urban Area-based definitions, and the Business and Industry (B&I) Loan Program definition, we were able to designate an observation as "rural" based on SF3 geographic identifiers. For the OMB-based definition, we merged a file identifying metro/nonmetro counties into SF3, matching by a county ID number. For the RUCAbased definition, we merged a file identifying tracts by RUCA code into SF3, matching by a tract ID number.

Source: The 2006 American Community Survey; the 2006 Consumer Population Survey (Poverty 46-Part 100125_3) Annual Social & Economic Supplement does not supply any data to calculate the proportion below 50 percent of FPL. The percentage at 100% FPL is 14.9; percentage at 200 is 34.6.

The data reported in the form are from ACS, Report C17024. The calculation for the 3 breakouts require the addition of the number of children aged 0 - 17 at the ratio levels of under 0.50, plus 0.50 to 0.99, plus 1.00 to 1.24, plus 1.25 to 1.99. The total number of children aged 0--17 reported in C17024 is 3,173,411. The percent calculations have been extrapolated to the 2006 population estimate for children aged 0-19.

Field Name: HSIRace_FosterCare

Row Name: Number living in foster home care

Column Name:

Year: 2009

Field Note:

No amount of followup on the written FOIA request to IDCFS was able to produce 2007 data by race and ethnicity. The 2007 total of foster children was available at www.state.il.us/dcf/foster/index.shtml and is being submitted under 'unknown' race. The difference in total from 2006 is 3 children. The race distribution reported last year has likely not changed much.
