Compared to the 2001 CSHCN survey, there were wording changes, skip pattern revisions, and additions to the questions used to generate the NPM06 indicator for the 2005-2006 CSHCN survey. There were also issues around the reliability of the 2001 data because of the sample size. The data for the two surveys are not comparable for PM #06 and the 2005-2006 may be considered baseline data.

Column Name:

Year: 2006

Field Note:

The data reported in 2006 are pre-populated with the data from 2004, 2005 for this performance measure.

Annual data is not available for this measure; however, the state CSHCN program annually measures progress for the children served through CSHS.

· During SFY 2005, 65% of children age 14-21 receiving CSHS care coordination services had a service plan that incorporated transition defined as movement from school to work, pediatric to adult health care, or home to independent living.

In addition, the North Dakota Center for Persons with Disabilities conducted a 2005 Transition Exit Study with the following results:

· 90.8% of Special Education students most recent IEP's identified an anticipated career or postsecondary employment goal while 5.36% of Special Education students received guidance in planning an anticipated career or postsecondary employment goal compared to 19.5% of General Education students.

LIST OF MCH PRIORITY NEEDS

[Sec. 505(a)(5)]

STATE: ND FY: 2009

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. To increase physical activity and health weight among women.
2. To increase the initiation and duration of breastfeeding. (This State Performance Measure has been inactivated because it duplicates FPM #11.)
3. To increase access to dental services for low-income women.
4. To increase access to preventive health services for women.
5. To reduce the rate of intentional and unintentional injuries among children and adolescents.
6. To increase physical activity among pre-school and school age children.
7. To increase the percent of healthy weight among children and adolescents.
8. To reduce the impact of chronic health conditions on children.
9. To improve geographic access to pediatric specialty care providers.
10. To increase information and awareness about available services.

STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET
STATE: ND

SP # 1

PERFORMANCE MEASURE:

The percent of healthy weight among women age 18-44.

STATUS:

Active

GOAL

To increase physical activity and healthy weight among women.

DEFINITION

Healthy weight will be defined as a Body Mass Index (BMI) in the range >18.0, <= 25.0.

Numerator:

The weighted number of women age 18-44 with a Body Mass Index (BMI) in the range >18.0, <= 25.0.

Denominator:

The number of women age 18-44.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

19-01 Healthy weight in adults (age adjusted, aged 20 years and over)

DATA SOURCES AND DATA ISSUES

BMI for the numerator will be collected from the BRFSS. Population totals for the numerator will be the weighted number of women age 18-44 from the BRFSS.

SIGNIFICANCE

The percent of ND women age 18-44 who were overweight and obese increased from 2000 to 2003. In 2003, only 42% of ND women age 18-44 met the recommendation for moderate physical activity and 31% the recommendation for vigorous physical activity.

SP # 3

PERFORMANCE MEASURE:

The percent of women age 18-44 enrolled in Medicaid who receive a preventive dental service.

STATUS:

Active

GOAL

To increase access to dental services for low-income women.

DEFINITION

A dental services will be defined as a health care claim for a either a diagnostic or preventive dental procedure during the calendar year.

Numerator:

The number of females age 18-44 who had a health care claim for a either a diagnostic or preventive dental procedure during the calendar year.

Denominator:

The number of females age 18-44 enrolled in Medicaid at any time during the calendar year.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

21-10 Annual dental visits (age adjusted, aged 2 years and over)

DATA SOURCES AND DATA ISSUES

Medicaid enrollment and claims data

SIGNIFICANCE

A significant unmet need in North Dakota is access to dental health. Many individuals do not realize that oral health affects their total health. Since poor oral health contributes to poor health status, preventive oral health needs to be promoted.

SP # 4

PERFORMANCE MEASURE:

The degree to which women age 18-44 have access to preventive health services as measured by 5 indicators of health care access.

STATUS:

Active

GOAL

To increase access to preventive health services for women.

DEFINITION

The rating, on a scale of 0 to 3, for each of five indicators of access to preventive health services. The five indicators are: 1) percent with health insurance, 2) percent with a PAP test in the last 3 years, 3) percent with cholesterol test in last 5 years, 4) percent ever had a mammogram, and 5) percent with 1st trimester prenatal care. The ratings are based on data from the most current source.

Numerator:

The rating, on a scale of 0 to 3, for each of five indicators of access to preventive health services. The ratings are based on data from the most current source.

Denominator:

The maximum rating of 3 for each of five indicators for an overall maximum score of 15.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

01-01 – Persons with health insurance 03-11b – PAP tests 03-13 – Mammograms 12-15 – Blood cholesterol screening 16-06 – Prenatal care – beginning in the 1st trimester

DATA SOURCES AND DATA ISSUES

BRFSS and Vital Records

SIGNIFICANCE

Information collected through the needs assessment process and the Title V planning retreat indicated that women of child-bearing age in ND often lack access to preventive health services including mammograms and PAP tests, cholesterol checks, early and adequate prenatal care, and mental health and domestic violence screenings. Improving access to preventive health services can be expected to improve the health status of women of child-bearing age.

SP # 5

PERFORMANCE MEASURE:

The rate of deaths to children age 1-19 caused by intentional and unintentional injuries per 100,000 children.

STATUS:

Active

GOAL

To reduce the rate of intentional and unintentional injuries among children and adolescents.

DEFINITION

Deaths due to intentional and unintentional injuries will be defined as a primary cause of death as indicated on the child's death certificate within the ICD 10 range.

Numerator:

The number of deaths to children age 1-19 due to intentional and unintentional injuries.

Denominator:

The number of children and adolescents age 1-19.

Units: 100000 **Text:** Rate

HEALTHY PEOPLE 2010 OBJECTIVE

16-02 Child deaths (per 100,000 population).

DATA SOURCES AND DATA ISSUES

Child deaths due to intentional and unintentional injuries will be obtained from death certificates files from Vital Records. The population denominator will be obtained from Census data. Data will be reported in three-year averages.

SIGNIFICANCE

Between 1999 and 2001, unintentional injuries accounted for more than half of all deaths to children age 1-19. Nearly seven in ten of those deaths were due to motor vehicle accidents.

SP # 6

PERFORMANCE MEASURE:

The percentage of students who were physically active for a total of at least 60 minutes per day on five or more of the past seven days.

STATUS:

Active

GOAL

To increase physical activity among pre-school and school age children.

DEFINITION

The number of children age middle school grade 7-8 all ages and high school grade 9-12 ages < =17 who exercised or participated in a physical activity that made him/her sweat and breathe hard, such as basketball, soccer, running, or similar aerobic activities on 5 or more days during the past week.

Numerator:

The number of children age middle school grade 7-8 all ages and high school grade 9-12 ages < =17 who exercised or participated in a physical activity that made him/her sweat and breathe hard, such as basketball, soccer, running, or similar aerobic activities on 5 or more days during the past week.

Denominator:

The number of ND children age middle school grade 7-8 all ages and high school grade 9-12 ages < =17 in the selected weighted CDC data for the ND YRBS.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

22-6 Physical activity in children and adolescents

Increase the proportion of adolescents who engage in moderate physical activity for at least 30 minutes on 5 or more of the previous days.

DATA SOURCES AND DATA ISSUES

National Children's Health Survey and the Youth Risk Behavior Surveillance System (YRBS)

SIGNIFICANCE

Studies have shown that being overweight and obese is epidemic in the United States and in North Dakota and, in fact, is rising among children and adolescents, as well. Being overweight or obese is a major risk factor in the development of heart disease and diabetes. The way to prevent being overweight and obese is clear: increase the amount of physical activity and decrease the caloric intake. As a society, we are sedentary and are becoming more so in this era of computers, video games and television. That's why it is more important than ever to promote physical activity for our young people.

SP # 7

PERFORMANCE MEASURE:

The percent of ND children age 10-17 with a BMI in the normal weight range.

STATUS:

Active

GOAL

To increase the percent of healthy weight among children and adolescents.

DEFINITION

Normal weight is defined as a BMI > 5th but < 85th percentile.

Numerator:

The number of ND children age 10-17 with a BMI in the normal weight range.

Denominator:

The number of ND children age 10-17 in the National Children's Health Survey.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

19-03a Overweight or obesity in children (aged 6 to 11 years).

DATA SOURCES AND DATA ISSUES

National Children's Health Survey

SIGNIFICANCE

Healthy weight was identified by Planning Retreat participants as the 2nd most important health issue for children and adolescents.

SP # 8

PERFORMANCE MEASURE:

The degree to which the state can assess and plan for the health and related service needs of children with extraordinary medical needs.

STATUS:

Active

GOAL

To reduce the impact of chronic health conditions on children.

DEFINITION

Components 1 Surveillance and assessment through the availability and use of data a. Definition developed b. Prevalence estimate c. Assessment of burden and access to needed medical and related services 2. Relevant partners and stakeholders are involved in assessment and planning for children with extraordinary medical needs 3. Policy development, planning, and program development designed to address the needs of children with extraordinary medical needs and their families occurs. a. Participation with the interim legislative child health study b. Participation on the Medical Needs Task Force c. Participation in planning for a Medicaid waiver d. Participation in writing and submission of a waiver e. Participation in implementation of a waiver f. Participation in evaluation of the waiver

Units: 9 **Text:** Scale

HEALTHY PEOPLE 2010 OBJECTIVE

16-23

16-23 Service systems for children with special health care needs.

DATA SOURCES AND DATA ISSUES

Data source is the State CSHCN program.

SIGNIFICANCE

12.4% of ND children have a special health care need. 62% of families with CSHCN's feel they have adequate private and/or public insurance to pay for the services they need. Families also relay they experience stress with caregiving responsibilities and could benefit from additional support services.

SP # 9

PERFORMANCE MEASURE:

The percent of families who reported they "had no problem at all" in getting care for their child from a specialist doctor.

STATUS:

Active

GOAL

To improve geographic access to pediatric specialty care providers.

DEFINITION

The percent of families who reported they "had no problem at all" in getting care for their child from a specialist doctor.

Numerator:

Of families who indicated their child's personal doctor or nurse thought their child needed to see a specialist doctor, the number who indicated they "had no problem at all" in getting care for their child from a specialist doctor.

Denominator:

The number of families who indicated their child's personal doctor or nurse thought their child needed to see a specialist doctor.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

16-23

16-23 Service systems for children with special health care needs.

DATA SOURCES AND DATA ISSUES

National Survey of Children's Health. Data for this measure will not be available on an annual basis because the survey will only be repeated every four years.

SIGNIFICANCE

Access to pediatric specialty care for CSHCN was a priority need identified through the CSHS Family Survey, the SLAITS National CSHCN Survey, and family focus groups conducted by the CSHCN program.

SP # 10

PERFORMANCE MEASURE:

The percent of activities completed in the CSHS Public Information Services plan.

STATUS:

Active

GOAL

To increase information and awareness about available services.

DEFINITION

The percent of activities completed in the CSHS Public Information Services plan.

Numerator:

The number of activities completed in the CSHS Public Information Services plan.

Denominator:

The number of activities proposed in the CSHS Public Information Services plan.

Units: 100 **Text:** Percent

HEALTHY PEOPLE 2010 OBJECTIVE

16-23

16-23 Service systems for children with special health care needs.

DATA SOURCES AND DATA ISSUES

CSHS Public Information Services Plan

SIGNIFICANCE

Secondary data sources and comments from family members at the Title V planning retreat indicated that families often do not have access to the information they need about available programs and services for their children with special health care needs.

SO # 1

OUTCOME MEASURE:

The ratio of the American Indian to White mortality rate due to unintentional injuries among 15 through 18 year olds.

STATUS:

Active

GOAL

To reduce disparities among American Indian children.

DEFINITION

Rate

Numerator:

The three-year average mortality rate per 100,000 due to unintentional injuries for White adolescents age 15 to 19

Denominator:

The three-year average mortality rate per 100,000 due to unintentional injuries for American Indian adolescents age 15 to 19

Units: 1 **Text:** Ratio

2007 -The source for this data is the North Dakota Department of Health -- Division of Vital Statistics. The numerator for the percent of infants born to pregnant women receiving prenatal care beginning in the first trimester under Medicaid and the numerator for the percent of pregnant women with adequate prenatal care (observed to expected prenatal visits is greater than or equal to 80% (Kotelchuck Index) under Medicaid are the same. This is due to the high number of unknown values for the date of first prenatal care visit. Since we no longer collect the trimester prenatal care began, calculation is needed to compute this from the date of birth and date of first prenatal care visit, compared to the gestational age at birth. This leaves unknown trimester data. As more states convert to the new US Standard birth record, this may no longer be a good indicator.

43. **Section Number:** Indicator 09A
Field Name: HSIRace_DropOutPercent
Row Name: Percentage of high school drop-outs (grade 9 through 12)
Column Name:
Year: 2009
Field Note:
2007-The source for this data is the North Dakota Department of Public Instruction (DPI). By definition, the data restricts "dropout" to only those students who were listed as dropouts on the DPI four-year database. So in effect, the data is for collective dropouts of the "2007 graduating class". The numerator in this case is the total number of dropouts in the cohort population. This includes grade 9 dropouts in 2003-2004, grade 10 dropouts in 2004-2005, grade 11 dropouts in 2005-2006 and grade 12 dropouts in 2006-2007. The denominator in this case is the total number of students in the cohort population. Rates are produced for the aggregate and each respective subgroup. DPI has established the operative definition of this dropout cohort model. Cohort rates measure what happens to a cohort of students over a period of time. Cohort rates show the probability that an incoming 9th grade student has of completing high school in four years. This measure is very accurate when individual students are tracked from year to year. High school dropouts are estimated in North Dakota from the number of graduates and the number of dropouts in the cohort during their four years in high school. Cohort rates, like event rates, are calculated from complete data reported by all high schools.
