**STATE PROFILE FOR FY 2009**  
*[SEC. 506(A)(1)]*  
**STATE: PR**

1. State MCH Administration:  
*(max 2500 characters)*

The Assistant Secretariat for Family Health and Integrated Services of the PRDoH administers the MCH/CSHCN programs. In Puerto Rico, the Title V Program supports direct services not covered by the GIP, such as the provision of contraceptive methods for low income population and subspecialty services for CSHCN. Title V funds are also used to support needs assessments and other activities geared to improve the health status of WCBA, infants, children, adolescents and CSHCN. Among the most relevant programs which are implemented with the Title V funds we want to highlight the following: the Home Visiting Program and the Comprehensive Adolescent Program. The Title V provides leadership and supervision to other related programs, such as SSDI, Healthy Start, "Comenzando Bien" of March of Dimes, Universal Newborn Hearing Screening, Early Intervention Program, Sexual Abstinence Education Program, Addressing Asthma from a Public Health Perspective and its Surveillance System, Early Childhood Comprehensive Systems and the Birth Defects Surveillance System.

Data regarding the grade in which the children are enrolled is not available in the billing forms. The reported number is an estimation based on the information provided by the Health Insurance Commissioner and the Administration of the GIP that reflects the number of 8 to 9 year old children who received protective sealants on at least one permanent molar tooth during the last year (2006).

Data on the denominator is the estimated population of children of 8 and 9 years old in PR according to the US Census.

We recommend that this performance measure be revised to include age instead of grade in school.

**Field Name:** PM17

**Row Name:**

**Column Name:**

**Year:** 2005

**Field Note:**

A panel of experts in neonatology of the Pediatric University Hospital provided a list of Level II and Level III NICUS available in the Island. Only four (4) level III NICUS were identified and are located at:

1) Pediatric University Hospital (PR Medical Center), 2) Municipality Hospital of San Juan (also located at the PR Medical Center - San Juan), 3) Hospital Auxilio Mutuo (San Juan), and Hospital Interamericano de Medicina Avanzada (Caguas).

Preliminary birth data for 2005 provided by the Office of Informatics and Technology Advances (OITA) of the Department of Health.

**PERFORMANCE MEASURE # 18**

Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester.

**Annual Objective and Performance Data**

	2003	2004	2005	2006	2007
Annual Performance Objective	84	85	86	87	88

Denominator	50,803	51,223	50,687	47,806	36,611

Check this box if you cannot report the numerator because  
 1. There are fewer than 5 events over the last year, and  
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

Numerator and Denominator: Preliminary data provided by the Office on Informatics and Technology Advances (OITA) of the Department of Health.

Beginning in 2005, changes were introduced to the birth certificate. The earlier version of the birth certificate asked the woman the month of pregnancy when she started prenatal care, while the new version asks her the date when she began prenatal care.

In 2006, 11.2% (3470) of the women who delivered did not answer the question and were regarded as missing values for this field in the birth certificate. The reported number reflects the proportion of women who provided an answer for the question.

- Section Number:** Performance Measure #18

**Field Name:** PM18

**Row Name:**

**Column Name:**

**Year:** 2005

**Field Note:**

Data for 2005 is final. As a result of the change in the birth certificate, the way this information is asked of the woman changed. The previous version of the Birth Certificate asked the month of pregnancy when she began prenatal care. The new version asks the woman the date when she began prenatal care.

Over 3,000 women did not answer the question and were treated as missing values for this variable in particular. The reported number reflects the proportion of women who provided an answer for the question.

**STATE PERFORMANCE MEASURE # 1**

**Field Note:**  
 The annual objective and performance data was revised after a validation effort of our datasets. Therefore, our annual indicators are higher than shown on the table; for 2004 the annual indicator was 8.4. The Birth Registry final database for 2005 is preliminary; we are in the process of gathering data from the 2005 vital statistics to perform record linkage between the data bases. The 2006 prevalence ratio is provisional since the total live births for 2006 is not available yet, so it was estimated from the Birth Registry 2005 data. We are also awaiting data from August to December from two municipalities.
- Section Number:** State Performance Measure #7  
**Field Name:** SM7  
**Row Name:**  
**Column Name:**  
**Year:** 2005  
**Field Note:**  
 The annual performance measure wording was revised to be in accordance with the terminology and measure of objective 16.15 from Healthy People 2010. We are reporting the prevalence at birth of the NTD. The numerator was provided by the Birth Defects Surveillance System. The 2005 prevalence ratio is provisional. The total live births were estimated from the Birth Registry preliminary data. The annual performance objectives were also revised for years 2004 to 2010. Reported data shows Birth Surveillance cases identified through the population based active surveillance and after linking vital stats data sets. The percentage increase in the prevalence ratio might be related with new efforts to confirm cases from the vital stats data sets and by the implementation of Law 351 for the regulation of Birth Defects Surveillance in Puerto Rico. We have continued with surveillance in 100% of birthing hospitals, and at the two pediatric hospitals in the Island, and recruited two more abstractors to conduct surveillance sponsored by CDC funds.

 1. There are fewer than 5 events over the last year, and  
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

**LIST OF MCH PRIORITY NEEDS**

[Sec. 505(a)(5)]

**STATE: PR FY: 2009**

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. To improve maternal health.
2. To reduce unintended pregnancies.
3. To improve pediatric health.
4. To reduce teen pregnancies.
5. To prevent and reduce behavioral risk factors such as smoking, alcohol use and substance abuse among teens and pregnant women.
6. To reduce unintentional injuries.
7. To increase availability and accessibility to preventive and quality primary and specialty health care services for the MCH/CSHCN populations.
8. Decrease morbidity and mortality due to bronchial asthma.
9. Improve coordination among health care plans, primary physicians and the Pediatric Centers.
10. Promote successful transition of youth with special health care needs to adult life.

SP #     1    

**PERFORMANCE MEASURE:**

The number of HIV positive pregnant women treated with AZT.

**STATUS:**

Active

**GOAL**

To reduce the rate of perinatal HIV transmission

**DEFINITION**

The number of pregnant women whose HIV screening test result was positive and received AZT of the total number of pregnant women whose HIV screening test result was positive.

**Numerator:**

Number of pregnant women whose HIV screening test result is positive and was treated with received AZT.

**Denominator:**

Total number of HIV + women who have a live birth

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Pediatric AIDS program reports and vital statistics

**SIGNIFICANCE**

Puerto Rico is among the first 5 states and jurisdictions with the highest prevalence of HIV/AIDS. Among Puerto Rican women, the most common route of infection is heterosexual transmission. In contrast, their partners are most commonly infected through intravenous drug use. It has been found that AZT treatment during pregnancy, at the time of delivery and postnatally reduce the percentage of HIV infected infants. Based on these facts P.R. has established a public policy aimed at reducing the rate of perinatal HIV transmission.

SP # 2

**PERFORMANCE MEASURE:**

Establish a Home Visiting program in at least 90% of the Island by the year 2,010.

**STATUS:**

Active

**GOAL**

To establish a home visiting program for at risk pregnant women and children under 3 years of age

**DEFINITION**

The number of municipalities participating in the home visiting program of the total municipalities in the Island.

**Numerator:**

Number of municipalities participating in the program

**Denominator:**

Total number of municipalities in the Island

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

The State Title V application and annual report of P.R. will provide information concerning the progress of the implementation of the home visiting program in the areas where the health care reform has been established.

**SIGNIFICANCE**

Home visiting programs have been a very effective strategy for improving birth outcomes and infant mortality rates.

SP #        3

**PERFORMANCE MEASURE:**

Prevalence of tobacco use among pregnant women

**STATUS:**

Active

**GOAL**

To determine the prevalence of tobacco use among pregnant women by health regions

**DEFINITION**

Percent of women who report that smoked during pregnancy the total of women participating in the survey. ESMIPR; PRAMS-like)

**Numerator:**

Number of women surveyed who report that smoked during pregnancy.

**Denominator:**

Total number of women surveyed.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Analysis of a sample of pregnant women by health regions surveyed for tobacco use during pregnancy.

**SIGNIFICANCE**

Cigarette smoking has been well established as a risk factor for LBW and IUGR; an estimated 25 percent of pregnant women smoke throughout their pregnancies in the U.S. If all pregnant women refrained from smoking, fetal and infant deaths would be reduced by 10%, saving about 15 infants per year in P.R. The relative risk for LBW among smokers compared to nonsmokers has been estimated to be about 2.42. The Institute of Medicine considers cigarette use to be the clearest risk factor for LBW delivery. In P.R., LBW has maintained a sustained increase since 1988. Therefore, it is crucial for us to determine the percentage of smoking during pregnancy by health regions. Having this information, specific strategies can be developed to prevent smoking during pregnancy and consequently reduce the percentage of LBW and infant mortality rate in the Island.

SP # 4

**PERFORMANCE MEASURE:**

The birth rate among girls 10-14 years of age

**STATUS:**

Active

**GOAL**

To reduce the birth rate among girls 10-14 years of age

**DEFINITION**

The number of live birth born to girls 10-14 per one thousand girls 10-14 years old.

**Numerator:**

Number of live births to girls 10-14 years of age

**Denominator:**

Number of girls in the Island 10-14 years of age

**Units:** 1000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Vital statistics and census data

**SIGNIFICANCE**

The adverse health and socioeconomic consequences of pregnancy and childbearing in early adolescence are well recognized. Teenage mothers are more likely than older women to receive inadequate prenatal care and to experience more complications of pregnancy and delivery. In addition, their babies are at higher risk of LBW, prematurity morbidity and mortality. On the other hand adolescent mothers are more likely than older women to leave high school before graduation, to have decreased earning potential and to live in poverty. In addition, early sexual engagement can result in a higher risk for STD's. Monitoring of this performance measure will allow us to assess several interventions aimed at improving the health and well being of children and adolescents, including the abstinence education program.

SP # 5

**PERFORMANCE MEASURE:**

The rate of cesarean section in Puerto Rico

**STATUS:**

Active

**GOAL**

To decrease the rate of cesareans section in Puerto Rico.

**DEFINITION**

The number of cesarean performed in a calendar year per one thousand live births registered in a calendar year.

**Numerator:**

The number of cesareans performed in a calendar year.

**Denominator:**

The number of live births registered in a calendar year.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Birth certificates are the source of data.

**SIGNIFICANCE**

In Puerto Rico, the issue of cesarean section has been a concern for policymakers, professional associations, the general public and investigators as well. The trend in cesarean section is alarming. Almost 4 out of 10 live births are delivered by cesarean section. Cesarean section contributes to increases in morbidity and mortality in both women and their infants. In Puerto Rico, it appears that the main contributing factor for c/s is convenience and not medical or obstetrical factors. A Task Force was created to evaluate the clinical and non clinical factors contributing to the high rates of c/s on the Island.

SP #          6

**PERFORMANCE MEASURE:**

Develop and maintain an active surveillance system for at least 55 birth defect diagnoses by 2010.

**STATUS:**

Active

**GOAL**

To expand and maintain the surveillance system for the identification of 55 birth defect diagnoses in the Island.

**DEFINITION**

The number of birth defects tracked by the Birth Defect Surveillance System.

**Numerator:**

Number of birth defect diagnoses tracked by the Birth Defects Surveillance System for reporting year.

**Denominator:**

Number of birth defect diagnoses to be tracked by the Birth Defects Surveillance System by 2010.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Birth Defects Surveillance System. The State Title V application and annual report for Puerto Rico provide information concerning the progress on this performance measure.

**SIGNIFICANCE**

Birth Defects are the second cause of infant mortality in Puerto Rico according to Vital Statistics data for 2002. Comprehensive surveillance and result dissemination on birth defects are the foundation to expand efforts to reduce the number of birth defects.

SP #        7

**PERFORMANCE MEASURE:**

Reduce the prevalence at birth of neural tube defects (NTD's)

**STATUS:**

Active

**GOAL**

To reduce the prevalence at birth of neural tube defects

**DEFINITION**

The number of live births, stillbirths, abortions, and pregnancy termination of any gestational age reported with neural tube defects; Spina Bifida, Encephalocele and Anencephaly of the total of live births plus the number of stillbirths during the reporting year.

**Numerator:**

Number of live births, stillbirths and abortions reported with neural tube defects; Spina Bifida, Encephalocele and Anencephaly

**Denominator:**

Number of live births during the reporting year.

**Units:** 10000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

16.15 Reduce the occurrence of spina bifida and other Neural Tube Defects (NTDs).

**DATA SOURCES AND DATA ISSUES**

Birth defects surveillance system (active surveillance) and Vital records. Cases were linked and confirmed by record abstraction. The measure is a ratio per 10,000 live births. The population-based data is systematically collected in a timely fashion. The prevalence at birth is the preferred measure of frequency of birth defects, this will produce an estimate that would more closely approximate the true incidence rate.

**SIGNIFICANCE**

The measure wording was revised to be in accordance with the objective 16.15 from the Healthy People 2010 objective. The NTD prevalence at birth rate in PR for 2004 was 8.6/10,000; we have confirmed a 47% reduction since 1996. Congenital anomalies are the second leading cause of infant mortality in the Island. This is a preventable condition. The monitoring of this measure will allow us to evaluate the effectiveness of the Islandwide campaign of folic acid supplementation among Women of childbearing age in Puerto Rico during the last 12 years.

SP #        8

**PERFORMANCE MEASURE:**

The rate of deaths to children aged 1-14 caused by asthma

**STATUS:**

Active

**GOAL**

To reduce the rate of deaths to children aged 1-14 caused by asthma

**DEFINITION**

The number of death to children 1-14 cause by asthma per one hundred thousand children 1-14 years old.

**Numerator:**

Number of deaths caused by asthma in the age group.

**Denominator:**

Number of children 1-14 years of age.

**Units:** 100000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Vital statistics and census data

**SIGNIFICANCE**

As mentioned elsewhere in the needs assessment, asthma is one of the most common chronic conditions affecting children in P.R. It causes a significant proportion of school absenteeism, emergency room visits, hospitalizations and deaths secondary to respiratory failure.

SO #        1

**OUTCOME MEASURE:**

The maternal mortality rate per 100,000 live births

**STATUS:**

Active

**GOAL**

To reduce the maternal mortality rate

**DEFINITION**

Number of deaths of women while pregnant or within one year of termination of pregnancy, irrespective of duration and the site of pregnancy, from any cause related or aggravated by the pregnancy or its management, but not from accident or incidental per one thousand live births.

**Numerator:**

Number of maternal deaths

**Denominator:**

Number of live births

**Units:** 100000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Vital records collected by the state

**SIGNIFICANCE**

Understanding the characteristics of women who died as a result of pregnancy complications and the risk factors for pregnancy related deaths is essential if we are to develop strategies to prevent both mortality and morbidity associated with pregnancy complications.

1. **Section Number:** Health Systems Capacity Indicator #02

**Field Name:** HSC02

**Row Name:**

**Column Name:**

**Year:** 2007

**Field Note:**

Updated data for 2007. For source of information refer to 2006 notes.

The children less than one year old represent about 1.6% of the eligible population and 1.5% of the total insured population.

Assuming that in PR the Medicaid funds are used to pay the population below 100 SPL, the eligible population below 100 SPL (Medicaid) were 1,023,847 and those insured were 1,106,145.

The numerator and denominator represent the 1.5% and 1.6% of children under 1 year old and below of the 100 SPL eligible and insured for the GIP, respectively.

2. **Section Number:** Health Systems Capacity Indicator #02

**Field Name:** HSC02

**Row Name:**

**Column Name:**

**Year:** 2006

**Field Note:**

Data represents the GIP infant population. It was provided by the Health Insurance Administration (ASES).

The numerator is the number of infants who received at least one initial screening service. The denominator is the total number of eligible infants in the GIP for year 2006.

Since ASES do not provide the number of Medicaid and SCHIP individually, the reported data includes GIP participants less than 1 year old.

3. **Section Number:** Health Systems Capacity Indicator #02

**Field Name:** HSC02

**Row Name:**

**Column Name:**

**Year:** 2005

**Field Note:**

Data represents the GIP sector only. It was provided by the Health Insurance Administration. The numerator is the estimated number of infants who received at least one initial screening service according to the EPSDT. This percentage is a reflection of the Medicaid contribution to the total GIP cost. The denominator is the total number of infants enrolled in the GIP for FY 2004-2005.

**HEALTH SYSTEMS CAPACITY MEASURE # 03**

The percent State Childrens Health Insurance Program (SCHIP) enrollees whose age is less than one year during the reporting year who received at least one periodic screen.

The denominator represents all EPSDT eligible children aged 6 through 9 years for the year 2006. These numbers are unduplicated and the Health Insurance Administration (ASES, Spanish acronym) was provided it.

3. **Section Number:** Health Systems Capacity Indicator #07B

**Field Name:** HSC07B

**Row Name:**

**Column Name:**

**Year:** 2005

**Field Note:**

All EPSDT eligible children (0-100% FPL) hold the GIP, as well as those in the FPL 101-200%. Both of these groups have direct access to dentists. However, it is quite difficult to estimate the proportion of children 6 through 9 years of age who have received a dental service during any year. In the past year, the collected and reported information was related to the number of encounters or visits for dental services. Since a child may have more than one visit per year, the number of encounters was not appropriate to estimate the percent of children who use dental services in Puerto Rico.

This year, the number provided by the GIP administration (ASES) is the unduplicated number of children 6 to 9 years who received at least one dental service. That is the reason that explains the decrease in this annual indicator.

**HEALTH SYSTEMS CAPACITY MEASURE # 08**
