The Agency uses the Personnel Cost Accounting System (PCAS) to document personnel expenses. Annually MCH staff review PCAS codes and realign with the levels of the MCH pyramid.

The Bureau and the Agency continue to work toward devoting more resources, effort and expenses down the MCH pyramid to enabling, population based and infrastructure activities and interventions.

During the past few years of decreasing budgets, this has been and continues to be a challenge.

Due to the above activities, shifts in expenses by the pyramid levels have occurred in the past few years.

**Field Name:** AdminBudgeted

**Row Name:** Administration

**Column Name:** Budgeted

Year: 2006

**Field Note:**

There is a significant increase in the budget from FY05 to FY06. It appears that the figure in the budget for FY05 was based only on projected administrative costs for the federal MCH Block Grant funds. The budget for FY06 is based on a combination of all of the fund combinations in the Federal-State MCH Block Grant Partnership section.

1. State MCH Administration:  
*(max 2500 characters)*

The General Assembly created the South Carolina Department of Health and Environmental Control (DHEC) in 1973 when it reunited the Board of Health and the Pollution Control Authority. The agency's mission is to promote and protect the health of the public and the environment. Every South Carolinian is touched by DHEC everyday. The agency is under the supervision of the Board of Health and Environmental Control. Seven members are appointed by the Governor representing each congressional district and one at large member. After 3 years of consolidation from 12 districts to 8 regions, the streamlined administration has resulted in efficiencies and increased effectiveness, specifically resulting in cost savings, increased accountability and improved customer service. DHEC continues to strive toward maximum usage and improvement of quality services to its customers. A focus on performance management has strengthened its activities. DHEC continues to operate local health departments and clinics to ensure that the many programs and services it provides meet the needs of the local areas. Decisions for service delivery are targeted toward best practices and are data driven. The central office is located in Columbia, the state capitol.

Regional staff continue to provide follow-up services for abnormal findings, hearing impairment, inborn errors of metabolism, infections, and lead screenings or cases. Services also include referrals to other services (BabyNet, WIC, FP, CRS, Medicaid) and enrollment into and/or linkage with a medical home. Postpartum newborn home visit: Regional staff provide or ensure that newborns (priority group is Medicaid) receive service directly or through a partner. Legislative dollars were allocated to DHEC last year to assure capacity for newborn home visits. Support Services/FIMR process - identified coordinator position vacant, however, Regional staff assure that deaths are reviewed to facilitate improved access to services, inclusion in an integrated system and capacity of community resources. Staff provide home visits that include initial assessment, referrals and grief counseling.

b. Population-Based Services:  
*(max 2500 characters)*

Prenatal care linkage and referral - Regional staff educate and provide prenatal care linkage and referral for women with positive pregnancy tests to decrease barriers to care and encourage early enrollment. Newborn Screening, Tracking and Follow-up: The state implemented an expanded panel and computer system for metabolic screening facilitating CY 2007 births to be linked to metabolic screening data with birth certificates. All 48 birthing hospitals are screening more than 98% of infants for hearing loss. WCS maintains a statewide registry of clients with congenital metabolic disorders, monitors laboratory tests, makes recommendations for follow-up, and refers clients to CSHCN to determine genetic testing and treatment eligibility.

c. Infrastructure Building Services:  
*(max 2500 characters)*

Community Assessment and Planning: identified coordinator who assures completion of annual community assessment plan/update designed to create an integrated system of care that is inclusive of each county in the Region. Plan includes synthesis and analysis of multiple data sources, needs and assets, resources available, service gaps, prioritization of strategies. Critical public system of care component areas includes medical, dental, nutritional, psychosocial, educational, mental, and behavioral. Partnerships and systems of care: identified staff assures there is coordination and collaboration to enhance, increase and enable partners (medical, dental, managed care entities, community health centers, hospitals, other private providers) to ensure access, provide services and enrollment into a medical home for infants, children and prenatal. Oral Health: through partnerships, this Division developed a statewide plan, conducted a public awareness campaign, increased Medicaid providers, and conducted a cost effective oral health needs assessment of public school children. The Division has established a comprehensive integrated statewide oral health plan and surveillance system, provided grant support for replacement of defective fluoridation equipment and conducted grassroots community meetings to identify community specific oral health improvement plans. The Oral Health Advisory Committee remains active in the development of a workplan to address the State Oral Health Assessment and Plan. CSHCN has undergone a programmatic review and is moving toward Centers of Excellence for direct care and increased public health care coordination.

The General Assembly created the South Carolina Department of Health and Environmental Control (DHEC) in 1973 when it reunited the Board of Health and the Pollution Control Authority. The agency's mission is to promote and protect the health of the public and the environment. Every South Carolinian is touched by DHEC everyday. The agency is under the supervision of the Board of Health and Environmental Control. Seven members are appointed by the Governor representing each congressional district and one at large member. After 3 years of consolidation from 12 districts to 8 regions, the streamlined administration has resulted in efficiencies and increased effectiveness, specifically resulting in cost savings, increased accountability and improved customer service. DHEC continues to strive toward maximum usage and improvement of quality services to its customers. A focus on performance management has strengthened its activities. DHEC continues to operate local health departments and clinics to ensure that the many programs and services it provides meet the needs of the local areas. Decisions for service delivery are targeted toward best practices and are data driven. The central office is located in Columbia, the state capitol.

**STATE: SC**

**Form Level Notes for Form 11**

Performance Measure #2: Notes-2007 Data from South Carolina Chartbook of 2005/2006 National Survey of Children with Special Health Care Needs (NS-CSHCN). Denominator= estimated number of CSHCN, 2001 NS-CSHCN annual indicator = 61.2%, no significant change from 2001 to 2005-06. SC's level of 60.4% is higher than the national level of 57.4%. Annual Performance Objectives for SC will need to be modified to reflect the use of NS-CSHCN data. Performance Measure #3: Notes-2007 Data from South Carolina Chartbook of 2005/2006 National Survey of Children with Special Health Care Needs (NS-CSHCN). Denominator= estimated number of CSHCN 2001 NS-CSHCN annual indicator=53.5%. While the outcomes for the 2001 and 2005-06 NS-CSHCN cannot be compared across survey years, there is no significant difference in the indicators. SC's level of 53.5% is higher than the National level of 47.1%. Annual Performance Objectives for SC will need to be modified to reflect the use of NS-CSHCN data. Performance Measure #4: Notes-2007 Data from South Carolina Chartbook of 2005/2006 National Survey of Children with Special Health Care Needs (NS-CSHCN). Denominator=estimated number of CSHCN 2001 NS-CSHCN annual indicator=58.1%; no significant change from 2001 to 2005-06. SC's level of 61.2% is comparable to the National level of 62%. Annual Performance Objectives for SC will need to be modified to reflect the use of NS-CSHCN data. Performance Measure #5: Notes-2007 Data from South Carolina Chartbook of 2005/2006 National Survey of Children with Special Health Care Needs (NS-CSHCN). Denominator=estimated number of CSHCN 2001 NS-CSHCN annual indicator =73.9%; while the outcomes for the 2001 and 2005-06 NS-CSHCN cannot be compared across survey years, there is a significant increase in the indicators. SC's level of 91.7% is higher than the National level of 89.1%. Annual Performance Objectives for SC will need to be modified to reflect the use of NS-CSHCN data. Performance Measure #6: Notes-2007 Data from South Carolina Chartbook of 2005/2006 National Survey of Children with Special Health Care Needs (NS-CSHCN). Denominator=estimated number of CSHCN age 12-17 only 2001 NS-CSHCN annual indicator=7.1%; while the outcomes for the 2001 and 2005-06 NS-CSHCN cannot be compared across survey years, a significant increase is noted in indicators. SC's level of 37.2% is slightly lower than the National level of 41.2%. Annual Performance Objectives for SC will need to be modified to reflect the use of NS-CSHCN data.

**PERFORMANCE MEASURE # 01**

The percent of screen positive newborns who received timely follow up to definitive diagnosis and clinical management for condition(s) mandated by their State-sponsored newborn screening programs.

**Field Level Notes**

1. **Section Number:** Performance Measure #9

**Field Name:** PM09

**Row Name:**

**Column Name:**

**Year:** 2007

**Field Note:**

Data provided for the years 2003, 2004, 2005, and 2006 were estimates based of the 2002 oral health needs assessment. The Division of Oral Health conducted another needs assessment in 2007. The 2007 data is lower than previous years data; however, the 2007 numbers more accurate. The formula for providing estimates in between needs assessment years will be examined for accuracy in upcoming years.

2. **Section Number:** Performance Measure #9

**Field Name:** PM09

**Row Name:**

**Column Name:**

**Year:** 2006

**Field Note:**

Data is obtained from school programs overseen by the Division of Oral Health. This is an underestimate of the total number of third graders with at least one sealant because school programs are not present in all school districts, nor within all schools in a given district (not all children are counted). The Division of Oral Health presumes that there is no difference between schools with or without a school program and that the percent provided by this sample is an accurate estimate for the population.

3. **Section Number:** Performance Measure #9

**Field Name:** PM09

**Row Name:**

**Column Name:**

**Year:** 2005

**Field Note:**

Provisional data. The provider of the data (Oral Health) cautions that the numbers for 2005 can be biased. The program is not present in all counties.

**PERFORMANCE MEASURE # 10**

**LIST OF MCH PRIORITY NEEDS**

*[Sec. 505(a)(5)]*

**STATE: SC FY: 2009**

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women," and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. /2009/ 1. Improve data and surveillance systems to enhance and promote healthcare decision-making (Infrastructure Building Service). //2009//
2. /2009/ 2. Improve access to a coordinated system of care through a systems approach (Infrastructure Building Service). //2009//
3. /2009/ 3. Increase access to an integrated system of care through medical home partnerships (Infrastructure Building Service). //2009//

**STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET**  
**STATE: SC**

SP #     2    

**PERFORMANCE MEASURE:**

Increase the percent of newborns receiving a newborn home visit.

**STATUS:**

Active

**GOAL**

To increase the percentage of Medicaid newborns in the state receiving a home visit.

**DEFINITION**

Number of home visits provided to Medicaid infants.

**Numerator:**

Number of infants who received a newborn home visit, resulting in a service paid by Medicaid during the state fiscal year.

**Denominator:**

Number of Medicaid newborn infants who have received a newborn home visit service paid by Medicaid during the same state fiscal year.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 1-6

Reduce the proportion of families that experience difficulties or delays in obtaining health care or do not receive needed care for one or more family members.

N/A

N/A

**DATA SOURCES AND DATA ISSUES**

Data Source: State Medicaid program.

**SIGNIFICANCE**

South Carolina is committed to ensuring that its mothers are equipped with the most needed parenting skill as early as possible. By visiting the new mothers at their home, the mother will be more comfortable to ask questions that she had not had a chance to ask at the birthing place. A home visit staff person provides preventive care including health promotion and education. Linking these families to a medical home will promote a systems approach to care.

SP #      3

**PERFORMANCE MEASURE:**

Increase the number of comprehensive medical home partnerships for pregnant women, children and CYSHCN.

**STATUS:**

Active

**GOAL**

To provide access to a coordinated system of care for pregnant women, children and children with special health care needs. The goal is to add new partnerships for each population every year.

**DEFINITION**

There are 3 levels of partnerships: 1) Comprehensive partnerships include the following: -MOA or formal agreement -Care coordination by a staff person located in the practice/office -An established referral and follow-up process (including an established number of contacts, meetings, staffings, etc.) -Comprehensive risk assessment/screenings (developmental, psycho social, etc.) 2) Level II partnerships include the following: -Formal or informal agreement -Risk Assessment/screenings (developmental, psycho social, etc.) 3) Level III partnerships would have minimal contact and infrequent contact.

**Numerator:**

The number of partnerships for 1) pregnant women, 2) children and 3) children with special health care needs.

**Denominator:**

The number of partnerships for 1) pregnant women, 2) children and 3) children with special health care needs.

**Units:** Yes **Text:** Text

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 1-4

Increase the proportion of persons who have a specific source of ongoing care.

N/A

N/A

**DATA SOURCES AND DATA ISSUES**

Data Sources: Data sources currently include regional reporting and surveys. Data Issues: We are in the process of developing a CQI process that would incorporate of all the partnership components.

**SIGNIFICANCE**

A medical home ensures comprehensive health for its patients. Care must be accessible, family-centered, continuous, comprehensive, coordinated, compassionate and culturally effective. This is especially true for children with special health care needs although this priority addresses all MCH populations. Enormous benefits will result to everyone through medical homes.

SP # 5

**PERFORMANCE MEASURE:**

Decrease the percent of family planning clients served by health departments whose pregnancy was unintended.

**STATUS:**

Active

**GOAL**

Decrease the percentage of women delivering a baby in a given year who report that their pregnancy was unintended.

**DEFINITION**

Percentage of women who report that their pregnancy was unintended.

**Numerator:**

Number of women responding that they wanted to be pregnant later or did not want to be pregnant then or at any time in the future.

**Denominator:**

Number of women surveyed.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 9.1

Increase the proportion of pregnancies that are intended. The target is 70%.

N/A

N/A

**DATA SOURCES AND DATA ISSUES**

Data Source: SC PRAMS survey of resident mothers delivering a live infant. Approximately 3,000 women are surveyed each year. Denominator and numerator data are weighted by the CDC. Data Issues: Need to link data sets from birth certificates and family planning clients to specifically track this performance measure. PRAMS contains state wide data. With linked data, we will be able to drill down and evaluate only the population we are serving.

**SIGNIFICANCE**

Unintended pregnancies adversely impact maternal behaviors during pregnancy. Women with unintended pregnancies are highest among teens, women with less than a high school education, Medicaid mother and women living in poverty.

SP #          6

**PERFORMANCE MEASURE:**

Increase the number of MCH programs that utilized research findings to better target programs to vulnerable populations.

**STATUS:**

Active

**GOAL**

Using research findings to refine programs and target vulnerable populations. The goal is to have 50% of the programs using research to target populations over the next year.

**DEFINITION**

Enhance the number of MCH programs that utilize research findings to make strategic decisions.

**Numerator:**

Total number of MCH programs that utilize research findings to make strategic decisions.

**Denominator:**

Total number of MCH programs.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 23-5

Increase the proportion of Leading Health Indicators, Health Status Indicators, and Priority Data Needs for which data—especially for select populations—are available at the Tribal, State, and local levels.

N/A

N/A

**DATA SOURCES AND DATA ISSUES**

Data Source: MCH programs. Data Issues: Need better epi support and capacity.

**SIGNIFICANCE**

By better using research findings, the root causes of morbidity and mortality are more specifically identified. This will result in targeted interventions that will achieve improved health outcomes more cost efficiently. Using research is especially effective when addressing health outcomes related to race and ethnicity and critical in a diverse state like South Carolina.

SP #        7

**PERFORMANCE MEASURE:**

Increase the number of health departments who implemented a review process for fetal and infant deaths.

**STATUS:**

Active

**GOAL**

All county health departments will, at a minimum, review the fetal and infant deaths to health department clients in order to do an assessment of existing systems, identify gaps and find ways to fill those gaps.

**DEFINITION**

The number of counties who participate in a FIMR.

**Numerator:**

Number of existing FIMRs

**DATA SOURCES AND DATA ISSUES**

Data Source: Data on fetal and infant deaths by county is gathered from vital statistics. The number of counties participating in a FIMR is gathered by the FIMR Coordinator. Data Issue: A data problem exists because we do not have a central data system where local FIMRs can send their review data.

**SIGNIFICANCE**

Infant mortality is a sentinel event that measures a community's social and economic well being as well as the health of its population. Fetal and Infant Mortality Review (FIMR) is a process that addresses these concerns. These reviews provide an opportunity to guide policy development, define quality programs and provide an assessment and quality assurance process.

SP #        8

**PERFORMANCE MEASURE:**

Increase the percent of infants who are breastfed at birth and thereafter.

**STATUS:**

Active

**GOAL**

To increase the number of women who breastfeed and also to increase the duration of breastfeeding. The goal is to reach the Healthy People 2010 objective of 75% of mothers breastfeeding in the early postpartum period

**DEFINITION**

Number of pregnant women who breastfeed in the early postpartum period.

**Numerator:**

The number of women who breastfeed.

**Denominator:**

The number of births/year.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 16-19

Increase the proportion of mothers who breastfeed their babies.

N/A

N/A

**DATA SOURCES AND DATA ISSUES**

Data Source: Vital statistics – number of births, PRAMS – number who breastfeed and WIC – number who breastfeed.

**SIGNIFICANCE**

There are a multitude of documented benefits to both the infant and mother from breastfeeding. Currently, South Carolina ranks 43rd out of all states in breastfeeding rates, leaving lots of room for improvement. This is also a multidisciplinary priority that will allow for many partnerships and collaboration within and outside of DHEC.

SP # 10

**PERFORMANCE MEASURE:**

Increase the percent of pregnant women who are health department clients who are linked and referred for prenatal care.

**STATUS:**

Active

**GOAL**

Public health screening programs are vital to the health of women and children. Early treatment for genetic and metabolic conditions, after pre-symptomatic diagnosis, reduces morbidity and mortality and allows for healthy growth and development.

**DEFINITION**

Number of health department clients that are linked and referred to a medical home for prenatal care.

**Numerator:**

Number of pregnant health department clients who are linked and referred to a medical home for prenatal care.

**Denominator:**

Number of positive pregnancy tests in the county health department clients.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 16-5

Reduce maternal illness and complications due to pregnancy.

N/A

N/A

**DATA SOURCES AND DATA ISSUES**

Data Source: Family planning database. Data Issues: Need to be able to link with vital record database.

**SIGNIFICANCE**

It has long been established that public health screening programs are vital to the health of women and children. Early treatment for genetic and metabolic conditions, after pre-symptomatic diagnosis, reduces morbidity and mortality and allows for healthy growth and development.

Denominator comes from SSA Supplemental Security Record for children under 18 with SSI in SC. CDC Wonder website was used to estimate the population in SC under 18 and under 16. The percentage of under 18/ under 16 was applied to the "SSI under 18" to get the final denominator. Numerator is from semi-annual report #T0701FT to get total number of Medicaid under 16. Data was used from Region 3 databases which kept good records of this information and found that 34.4% of their Medicaid recipients under 16 had SSI. We applied that 34.4% to the entire CSHCN population under 16 with Medicaid (4,337) to get the final numerator.
