**FIELD LEVEL NOTES**

1. **Section Number:** I. Federal-State MCH Block Grant Partnership

**Field Name:** PregWomenExpended

**Row Name:** Pregnant Women

**Column Name:** Expended

**Year:** 2007

**Field Note:**

This variance, an increase of \$286,182 (19.7%), is due to an increase in the amount of Program Income reported by local agencies providing family planning/reproductive health services (\$143,247), an increase in services provided by local health agencies (\$163,795) and an increase in related state operations expenditures (\$74,144). There were decreases in the Match provided by local health agencies (\$65,376) and state Maintenance of Effort funds (\$29,628).

2. **Section Number:** I. Federal-State MCH Block Grant Partnership

**Field Name:** PregWomenExpended

**Row Name:** Pregnant Women

**Column Name:** Expended

**Year:** 2006

**Field Note:**

This variance, an increase of \$651,843 (32.8%), is due primarily to an increase in the amount of Program Income from local agencies providing family planning/reproductive health services (\$634,000). Also, there was a modest increase in the amount of Local Aids dollars and slight decreases in the amounts of Match and State Operations dollars.

3. **Section Number:** I. Federal-State MCH Block Grant Partnership

**Field Name:** Children\_0\_1Expended

**Row Name:** Infants <1 year old

**Column Name:** Expended

**Year:** 2007

**Field Note:**

This variance, a decrease of \$266,468 (10.5%), is due primarily to a decrease in related state operations (\$203,702) and a decrease in services reported by local health agencies (\$90,308). There were modest increases in Match provided by local health agencies (\$14,643) and state Maintenance of Effort funds (\$13,910). There was a slight decrease in Program Income provided by local health agencies providing family planning/reproductive health services (\$1,011)

**Field Name:** Children\_1\_22Expended

**Row Name:** Children 1 to 22 years old

**Column Name:** Expended

**Year:** 2006

**Field Note:**

This variance, an increase of \$919,834 (11.3%), is due primarily to increases in Program Income from local agencies providing family planning/reproductive health services (\$401,000), and Match provided Local Agencies (\$454,000). Also, Local Agencies increased their spending of Title V dollars by \$95,894, while State Operations spending of Title V funds decreased by about \$32,000.

5. **Section Number:** I. Federal-State MCH Block Grant Partnership

**Field Name:** AllOthersExpended

**Row Name:** All Others

**Column Name:** Expended

**Year:** 2007

**Field Note:**

This variance, an increase of \$631,460 (13.1%), is due primarily to increases in Program Income from local agencies providing family planning/reproductive health services (\$1,011,285) and an increase in related state operations (\$207,197). These increases were offset by decreases in services reported by local health agencies (\$125,519) and Match reported by local health agencies (\$446,275). There was a modest decrease in state Maintenance of Effort funds (\$15,228).

**Field Note:**  
This variance, an increase of \$120,793 (11.9%), is due entirely to an increase in the amount of Match provided by local agencies (\$151,000). Spending of Title V funds for State Operations decrease by about \$30,000.

## FORM NOTES FOR FORM 6

Occurrent births: For CY 2007, according to the provisional birth file, closed 3/31/08, there were 71,720 occurrent births in Wisconsin; these data are provisional, Wisconsin Department of Health and Family Services, Division of Public Health, Bureau of Health Information and Policy. The final count of newborns screened for CY 2007 was 71,501 or 99.7%; 219 newborns were not screened. These infants were not screened for various reasons: some may have died or parents may have refused screening for religious cultural purposes.

For CY 2006: the corrected numbers are:  $70,867/71,226 = 99.49\%$  (99.5%) or 359 babies not screened.

Data Issues: NBS data files and birth certificate records are not linked. Provisional occurrent birth data indicate a small discrepancy between the numbers of babies born in Wisconsin and the numbers screened.

NBS data includes resident and occurrent births. Resident birth data are not available.

## FORM NOTES FOR FORM 7

Sources: 2007 Title V program data and Reproductive Health/Family Planning (RH/FP) data come from SPHERE (Secure Public Health Electronic Record Environment), the data collection system used by agencies receiving Title V funds, and 2007 NBS data from the Wisconsin State Laboratory of Hygiene. RH/FP data include persons receiving services supported with Title V (and matching) funds and do not include Title X. RH/FP data from years prior to 2005 included individuals who received services in Title X family planning clinics whose care was partially supported with Title V matching funds. Prior to 2005, agencies supported with Title X family planning funds also received substantial Title V matching funds to support reproductive health care services. Following implementation of the Medicaid Family Planning Waiver, Title X agencies no longer received Title V matching funds. Therefore, individuals receiving services in these clinics did not have a portion of their care supported with Title V funds, and are not included in Form 7.

Primary sources of health care coverage are required fields for local agencies that use SPHERE. Agencies not using SPHERE were required to report on health care coverage.

The data for primary sources of coverage for infants are: 1) estimates from the 2006 birth file; the 2007 birth file was not available for estimates of primary sources of coverage and NBS data do not have primary sources of coverage; and, 2) SPHERE data from 2007.

Data issues: There are many factors that affect our total numbers of individuals served (unduplicated) under Title V; therefore, from year-to-year, there are random fluctuations. Two of these factors are: data collection by local agencies and change of staff and MCH template objectives that are negotiated with local health departments each year, thereby affecting the numbers served by each agency.

**Column Name:** Title V Total Served

**Year:** 2009

**Field Note:**

Data issues: Total infants <1 year of age includes: 1) 71,720 and 2) Title V = [ 5,784 ( 737 CSHCN infants ) + (5,047 infants)]. The NBS file, and SPHERE (data collection system used by agencies receiving Title V funds); therefore, the Title V infants are included in the NBS numbers because it's likely those infants were screened. The percentage of primary source of coverage for Title V infants are: Title XIX – 18.9%, Title XXI – 14.4%, Private/Other – 24.9%, None - 3.6%, Unknown - 37.7%.

1. State MCH Administration:  
*(max 2500 characters)*

The Title V MCH/CSHCN Block Grants funds are administered by the Wisconsin Division of Public Health, Bureau of Community Health Promotion, Family Health Section. The FHS is clearly demarcated within the Division as the designee for administration of the Title V activities. This clear demarcation serves as a critical component to ensure comprehensive program activity and a single point of accountability for the state. The Family Health Section contains the MCH Unit which includes the MCH Program and the CSHCN Program.

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:

*(max 2500 characters)*

Wisconsin's Title V funds are distributed to local agencies and organizations (including tribes) on an annual basis through the Division of Public Health's performance-based contracting process. The purpose of performance-based contracting is to help agencies focus on improving health status and health outcomes for Wisconsin's citizens. Performance-based contracting is a non-competitive process and LHDs have the first right of refusal to the allocated funds. Every fall, the Division of Public Health initiates a three-way negotiation process with representatives from the LHDs, the DPH regional office staff, and the DPH central office staff. To make the negotiation process easier, LHDs may (but are not required to) select from a list of template objectives developed specifically by the MCH/CYSHCN Program that align with Wisconsin's priority needs for the maternal and child health population. (Template objectives are "pre-approved" activities and, as a result, streamline the negotiation process.) In 2007, the MCH/CYSHCN Program developed 35 template objectives addressing the MCH priorities as identified through the state's MCH needs assessment. Examples of templates include: pregnancy and healthy outcomes; comprehensive physical exams for uninsured or underinsured children; child passenger safety; home safety assessments; prevention and intervention for early childhood dental caries, newborn home visitation; health education activities; nutrition coalition building; and breastfeeding promotion. If LHDs do not select a template objective(s), they created a separate, distinct objective(s) that met the needs of the maternal and child health population within their jurisdiction. In addition, the objective must be deemed as an acceptable activity by the MCH/CYSHCN Program.

b. Population-Based Services:

*(max 2500 characters)*

Request for Proposals for statewide and regional MCH/CYSHCN projects are released on a competitive basis approximately every 5 years. In the Spring 2005, we embarked on a new competitive process with statewide program activities scheduled beginning July 1, 2005, through December 31, 2010. The five statewide projects address services to: improve infant health and reduce disparities in infant mortality; support a genetics system of care; improve child health and prevent childhood injury and death; improve maternal health and maternal care; and create a parent-to-parent matching program for families with CYSHCN. These projects perform under performance-based contracting, with some template objectives. The creation of the Regional CYSHCN Centers in January 2000 was in response to a series of assessments conducted throughout Wisconsin with families and providers along with technical assistance from national experts over the course of several years. The next funding cycle began January 1, 2006 - December 31, 2010. The goal is to establish regional leadership, as an extension of the state CYSHCN Program and enhance the local capacity to serve children and youth with special health care needs and their families and to meet the six National Performance Measures, as part of the President's New Freedom Initiative. Additional key model elements include: consultation, referral and follow-up; health benefits counseling; medical and dental home; training and technical assistance; and adolescent transitioning to adult care.

c. Infrastructure Building Services:

*(max 2500 characters)*

Wisconsin's Title V dollars are at work to build systems to include: family planning and reproductive health; perinatal services, newborn blood and hearing screening, early childhood comprehensive services; child health services including oral health, asthma, and injury; children with special health care needs through the support and enhancement of services/resources of regional CYSHCN centers; parent-to-parent support network; poison control services; integration of medical home; and the MCH Hotline (1-800-722-2295) including First Step for families who have children with special health care needs.

**Year:** 2007

**Field Note:**

These data are from 2006 and entered as provisional. Data for 2007 will not be available until late 2008. The most recent (entered as 2007, but 2006 data) from the National Immunization Survey show that Wisconsin's immunization estimated coverage rates for 4 DTaP, 3 Polio, 1 MMR, 3 Hep b, and 3 hib among kids 19-35 months of age rose from 83.0% in 2005 to 86.8% in 2006. This increase may be due to acceptance and use of the Wisconsin Immunization Registry (WIR).

**2. Section Number:** Performance Measure #7

**Field Name:** PM07

**Row Name:**

**Column Name:**

**Year:** 2006

**Field Note:**

Data issues: The most recent data from the CDC is from the National Immunization Survey (www.cdc.gov/nip under "data and statistics" and represent calendar year 2005. The vaccine coverage estimates for 2005 among Wisconsin children who were 19 to 35 months of age with 4 DTaP, 3 Polio, 1 MMR, 3 Hep b, and 3 hib doses was 82.2%. This is a slight decline from last year's estimate. The NIS states: "Remember, NIS provides estimates that include a margin of error. That's because it is a sample survey. Even though the sample is quite large -- about 30,000 children (nationally), it is just one of many possible samples. A different sample would result in a different--but probably quite similar estimate. The drop could be due to chance."  
 Although the national goal for 2010 is 90%, we have kept our 2010 and 2011 objectives at the same level based on program expertise.

**3. Section Number:** Performance Measure #7

Data issues: Due to fiscal constraints, CDC's National Immunization Survey was not completed for SFY 2005 (7/1/04-6/30/05), therefore, we used 2004 data for 2005. Although the national goal for 2010 is 90%, we have slightly revised our objectives to reflect 2004's data and program expertise.

Data issue: The data for 2005 cannot be amended in the TVIS; the data entered for 2005 are incorrect and should be 2,519/10,409 = 24.2%. Source: 2005 Pediatric Nutrition Surveillance System report (PedNSS); received from CDC in mid-January 07.

The subsequent years' objectives were revised to reflect 2004 and 2005 data that indicated about 25% of mothers breastfed their infants at 6 months of age. The HP 2010 objective is 50%; however, given current data and program knowledge, we feel that our objectives do not reflect current breastfeeding practices and have revised them downward.

**1. Section Number:** Performance Measure #12

**Field Name:** PM12

**Row Name:**

**Column Name:**

**Year:** 2007

**Field Note:**

Hearing screening data are reported on the newborn blood-spot card that is sent from the birth hospital to the Wisconsin State Lab of Hygiene (WSLH). The data are electronically messaged daily to the Wisconsin Early Hearing Detection and Intervention Tracking Referral and Coordination (WE-TRAC) system. Unlike the data reported in previous years from WSLH records, the 2007 data are generated directly from the WE-TRAC system. This method has helped resolve accuracy issues involving duplicate records and delayed records that occurred in the past. The data adhere to the CDC reporting standards for EHDI statistics; i.e., the screened number excludes newborns who were missed in one or both ears, refused screening, or died before screening was possible.

**2. Section Number:** Performance Measure #12

**Field Name:** PM12

**Row Name:**

**Column Name:**

**Year:** 2006

**Field Note:**

Data on hearing screening are reported on one page of the newborn blood-spot card that goes to the Wisconsin State Lab of Hygiene (WSLH). The data are delivered as a space-delimited file at least once a month, converted to a SAS dataset, and used to compile monthly reports on hearing screening in Wisconsin. The hearing screening records are also sent directly to the Wisconsin Early Hearing Detection and Intervention Tracking Referral and Coordination (WE-TRAC) System. Data issues: Hearing screening results are occasionally separated from the blood card, delaying accurate reporting. Alternatively, sometimes the blood screening is repeated, but not the hearing screening, therefore, there may be duplicate (inaccurate) reporting. In 2006 functionality was added to WE-TRAC to allow administrators to remove duplicate records from the WE-TRAC data set. Currently, we are developing reports that will allow us to take data from WE-TRAC rather than from the blood card file. This will allow for more accurate data, and will also allow us to include data on delayed inpatient screenings done for special care infants, and report on other "accounted for" babies, or babies that have a valid reason for not being screened. With these new reports and the rapid increase of hospitals reporting using WE-TRAC, we anticipate being able to use WE-TRAC data for future reporting.

Alternatively, sometimes the blood screening is repeated, but not the hearing screening, therefore, there may be duplicate (inaccurate) reporting. In 2005, the processing logic used to handle SLH records was changed to greatly reduce the occurrence of duplicate cases. In 2006, functionality was added to WE-TRAC to handle any remaining duplicate records. Also, a phased release system began in 2007. Data will be collected directly from facilities using WE-TRAC, which will place accurate testing and follow-up responsibility on the birth hospitals, lessening the possibility that hearing screening results (and follow-up services) will be lost or delayed.

Check this box if you cannot report the numerator because  
 1. There are fewer than 5 events over the last year, and  
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

In mid-2006, SPHERE changed to a new reporting method for collection of the ASQ:SE results, therefore, results were under reported in 2006. The 2007 increase in numbers of ASQ: SE screening results reflects improved reporting of results, as well as increased interest by LHDs in providing this screening program for young children.

**Row Name:**

**Column Name:**

**Year:** 2006

**Field Note:**

Data was transferred from SPHERE to new ASQ:SE screens but not all data came over as separate from the developmental screens. Thus data for 2006 of ASQ:SE screenings completed and results are under reported. SPHERE correction will collect sound data during 2007 and with more screening programs occurring throughout the state, more ASQ:SE screenings will be completed. It is expected that numbers reflecting age-appropriate social-emotional development of children ages 6 months to 5 years in the state will increase and better reflect progress in Wisconsin. The MCH program will monitor this situation and review the data indicating achievement for SPM#4.

Data Source: 2005 data from the Secure Public Health Electronic Reporting Environment (SPHERE). During 2005, data entry limitations did not allow an ability to distinguish child's developmental scores from social-emotional scores nor if the result of the testing was reported at age appropriate levels. About 22% of all clients, ages 6 months to 5 years, (or 1,084 of 4,876), received developmental assessments in 2005. This situation was corrected during the 2006 reporting period.

**Form Level Notes for Form 12**

Since 2007 data required by the TVIS, 2006 data were used as provisional data for 2007. These data are maintained in retrospective state databases and are not released or published until 12-18 months after the end of the data year; therefore, 2006 data will not be available until mid-2008.

**OUTCOME MEASURE # 01**

The infant mortality rate per 1,000 live births.

 1. There are fewer than 5 events over the last year, and  
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

**LIST OF MCH PRIORITY NEEDS**

*[Sec. 505(a)(5)]*

**STATE: WI FY: 2009**

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Disparities in Birth Outcomes: To improve birth outcomes among minority populations
2. Contraceptive Services (access to): To improve access and utilization to contraceptive services
3. Mental Health: To assure mental health services for all MCH populations
4. Medical Home: To assure a medical home for all children
5. Dental Health: To assure dental health for all children
6. Health Insurance and Access to Health Care: To assure health insurance and access to health care for all
7. Smoking and Tobacco Use: To decrease tobacco use among women and children
8. Intentional Childhood Injuries: To decrease intentional childhood injuries
9. Unintentional Childhood Injuries: To decrease unintentional childhood injuries
10. Overweight and At Risk for Overweight: To promote healthy lifestyles including promoting physical activity to achieve healthy weight

<b>PERFORMANCE MEASURE:</b>	Percent of eligible women enrolled in the Wisconsin Medicaid Family Planning Waiver during the year.
<b>STATUS:</b>	Active
<b>GOAL</b>	Increase the percent of income eligible reproductive-age women in Wisconsin who are enrolled in the Wisconsin Medicaid Family Planning Waiver.
<b>DEFINITION</b>	<p><b>Numerator:</b> Number of women enrolled in the Family Planning Waiver</p> <p><b>Denominator:</b> Number of women, ages 15-44, estimated to be Medicaid income eligible minus those who have existing Medicaid/BadgerCare coverage.</p> <p><b>Units:</b> 100   <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	9.3 Increase the proportion of females at risk of unintended pregnancy (and their partners) who use contraception.
<b>DATA SOURCES AND DATA ISSUES</b>	Enrollment data from Wisconsin Department of Health and Family Services, Division of Health Care Financing, Medicaid program data.
<b>SIGNIFICANCE</b>	Access to affordable and quality contraceptive and related reproductive health services is necessary for increased use of contraception among sexually active women and couples at risk of unintended pregnancy.

SP # 2

**PERFORMANCE MEASURE:**

Percent of Medicaid and BadgerCare recipients, ages 3-20, who received any dental service during the reporting year.

**STATUS:**

Active

**GOAL**

To increase the percentage of Medicaid and BadgerCare recipients, aged 3-20, who received any dental service during the state fiscal year.

**DEFINITION**

**Numerator:**

Numerator: Number of Wisconsin Medicaid and BadgerCare recipients, aged 3-20, who received any dental service during the state fiscal year.

**Denominator:**

Denominator: Total number of Wisconsin Medicaid and BadgerCare, aged 3-20, recipients during the state fiscal year.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

21-12

Increase the proportion of children and adolescents under age 19 years of age at or below 200 percent of the Federal poverty level who received any preventive dental service during the past year.

21-10

Increase the proportion of children and adults who use the oral health care system each year.

**DATA SOURCES AND DATA ISSUES**

Wisconsin Department of Health and Family Services, Division of Health Care Financing, Medicaid Program, claims and eligibility data for services provided.

**SIGNIFICANCE**

Oral diseases and conditions can be consequential to growth, function, ability to attend to learning, self-image and employability. The most frequent symptom of dental pathology is pain which can distract children from learning and playing, and limit their ability to eat and speak. Extensive early childhood caries has been shown to inhibit attainment of normal weight and height in toddlers. Dental and oral diseases are increasingly understood to compromise general health and function. Dental visits increase with increasing income and parental education. Low-income children who suffer from the most dental disease have the least access to care, despite publicly financed dental coverage.

SP #        3

**PERFORMANCE MEASURE:**

Percent of children, ages 6 months-5 years, who have age-appropriate social and emotional developmental levels.

**STATUS:**

Active

**GOAL**

To increase the percentage of children with age-appropriate social and emotional developmental levels.

**DEFINITION**

The number of children, ages 6 months through 5 years, who have age-appropriate social and emotional developmental levels.

**Numerator:**

The number of children, ages 6 months through 5 years, who have age-appropriate social and emotional developmental levels.

**Denominator:**

The number of children, ages 6 months through 5 years, who receive mental health screening using the "Ages and Stages Questionnaire: Social and Emotional Domain during the reporting period (ASQ:SE)."

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

18-7

Increase the proportion of children with mental health problems who receive treatment.

**DATA SOURCES AND DATA ISSUES**

Secure Public Health Electronic Record Environment (SPHERE) data reported by agencies who perform mental health screening for young children using the "Ages and Stages Questionnaire®: Social-Emotional (ASQ:SE)". This questionnaire/screening tool assesses children's social-emotional development at 6, 12, 18, 24, 30, 36, 48, and 60 months.

**SIGNIFICANCE**

Infant and early childhood mental health is of growing interest in public health. Wisconsin Governor Jim Doyle's KidsFirst Initiative recommends implementation of the Wisconsin Infant and Early Childhood Mental Health Plan developed by the Wisconsin Initiative for Infant Mental Health. One of the key recommendations is mental health screening and referral for children birth to age five. SPHERE collects information on developmental screening provided by POCAN, Home Visitation Outcomes Projects, and Title V-funded projects (local health departments and private non-profits including CYSHCN Regional Centers and Regional Center contractees), and Tribal Agencies (Honoring our Children). POCAN is the acronym for the comprehensive targeted home visiting program authorized under 46.515 Wisconsin statutes and stands for Prevention of Child Abuse and Neglect. In 2004, 2,662 Wisconsin children under six years of age received a developmental assessment.

SP # 4

**PERFORMANCE MEASURE:**

Rate per 1,000 of substantiated reports of child maltreatment to Wisconsin children, ages 0 - 17, during the year.

**STATUS:**

Active

**GOAL**

To decrease the number of children, ages 0-17, being maltreated in Wisconsin during the reporting year.

**DEFINITION**

The number of substantiated reports of child maltreatment to Wisconsin children, ages 0-17, during the calendar year.

**Numerator:**

The number of child abuse and neglect reports and substantiations in a given calendar year.

**Denominator:**

The number of children under age 18.

**Units:** 1000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

15-33

Reduce maltreatment and maltreatment fatalities of children.

15-34

Reduce the rate of physical assault by current or former intimate partners (for persons 12 and older).

**DATA SOURCES AND DATA ISSUES**

Annual Report to the Governor and Legislature on Wisconsin Child Abuse and Neglect, Office of Policy, Evaluation and Planning, Division of Children and Family Services, Wisconsin Department of Health and Family Services.

**SIGNIFICANCE**

Child maltreatment has physical, psychological, behavioral and societal consequences that can lead into long-term physical and mental health problems and economic consequences.

SP # 5

**PERFORMANCE MEASURE:**

Percent of children who receive coordinated, ongoing comprehensive care within a medical home.

**STATUS:**

Active

**GOAL**

To increase the percentage of Wisconsin children who have a medical home.

**DEFINITION**

The American Academy of Pediatrics describes care from a medical home as accessible, continuous, coordinated, family-centered, comprehensive, compassionate and culturally-competent.

**Numerator:**

Weighted number of children from the National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention.

**Denominator:**

Weighted number of children from the National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

1-4. Access to quality health services.  
Increase the proportion of persons who have a specific source of ongoing care.

**DATA SOURCES AND DATA ISSUES**

National Survey of Children's Health, National Center for Health Statistics, Centers for Disease Control and Prevention.

**SIGNIFICANCE**

A medical home is an approach to providing continuous and comprehensive primary care in a high-quality and cost-effective manner.

SP #          6

**PERFORMANCE MEASURE:**

Percent of children less than 12 years of age who receive one physical exam a year.

**STATUS:**

Active

**GOAL**

Increase the percent of children less than 12 years of age who receive one physical exam per year.

**DEFINITION**

**Numerator:**

Weighted number of children who received at least one physical exam within the past year.

**Denominator:**

Census estimate of children during calendar year.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Wisconsin Family Health Survey, Bureau of Health Care Financing Annual EPSDT Participation Report

**SIGNIFICANCE**

Health maintenance through primary care services, including well child check-ups results in early detection and treatment of health problems and improves the chances of leading a healthy life. The implementation of Wisconsin's Children's Health Insurance Program (BadgerCare) will increase health care utilization by children birth to 12 years of age.

SP # 7

**PERFORMANCE MEASURE:**

Percent of women who use tobacco during pregnancy.

**STATUS:**

Active

**GOAL**

Decrease the percent of women who use tobacco during pregnancy.

**DEFINITION**

**Numerator:**

Number of women who self-report the use of tobacco during pregnancy during the calendar year.

**Denominator:**

Total number of live births to Wisconsin women per calendar year.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Wisconsin birth certificate data file.

**SIGNIFICANCE**

Wisconsin's maternal smoking rate (16.5% in 2000) is above the national average (12.2% in 2000). Poor pregnancy outcomes due to maternal smoking are well documented. These substances can endanger the pregnancy and the newborn's health (low birth weight, higher risk of unsuccessful pregnancy and premature birth, and other health problems).

SP #        8

**PERFORMANCE MEASURE:**

Percent of children, ages 2-4, who are obese or overweight at or above the 95th percentile.

**STATUS:**

Active

**GOAL**

To reduce the percent of children, ages 2-4, who are obese or overweight

**DEFINITION**

The percentage of children, ages 2 to 5 years, receiving WIC services who are obese or overweight at or above the 95th percentile.

**Numerator:**

Unduplicated number of enrolled WIC participants who are children, ages 2-4, in Wisconsin at => 95 percentile during the reporting period.

**Denominator:**

Unduplicated number of enrolled WIC participants who are children, ages 2-4, in Wisconsin during the reporting period.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

CDC, Pediatric Nutrition Surveillance System (PedNSS)/WIC data.

**SIGNIFICANCE**

Childhood and adolescent obesity can lead to negative psychosocial and medical conditions. Medical conditions related to child and adolescent obesity can be both short and long-term. Overweight and obese children are at risk for sleep apnea, orthopedic complications, Type 2 diabetes, and elevated levels of cholesterol, blood pressure, triglycerides, and fasting insulin. Overweight adolescents have a 1.5 to 2-fold increased risk for being overweight as adults. As a result, they are also at increased risk for long-term medical conditions such as coronary heart disease, colon cancer, diabetes, asthma, and arthritis.

SP #      9

**PERFORMANCE MEASURE:**

Ratio of the black infant mortality rate to the white infant mortality rate.

**STATUS:**

Active

**GOAL**

To reduce the disparity (ratio) between the black and white infant mortality rates.

**DEFINITION**

Ratio of the black infant mortality rate to the white infant mortality rate.

**Numerator:**

The black infant mortality rate per 1,000 live births during the reporting period (most recent data for calendar year).

**Denominator:**

The white infant mortality rate per 1,000 live births during the reporting period (most recent data for calendar year).

**Units:** 1 **Text:** Ratio

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

State vital records.

**SIGNIFICANCE**

A significant gap exists in Wisconsin between the infant mortality rates (IMR) of African American and white infants. Infants born to African American women in Wisconsin are almost three times as likely to die in the first year of life than infants born to white mothers. This disparity of 3 to 1 exceeds the disparity of 2.4 to 1 for the nation as a whole. Although the overall IMR for Wisconsin declined from 17 infant deaths per 1,000 live births in 1970 to 7.2 per 1,000 in 1998, the IMR for African American babies hovered near 18 per 1,000 live births for the last decade. The IMR for whites was 5.6 infant deaths per 1,000 live births in 1998 compared to the block rate of 17.9 per 1,000 live births. This trend continued in 1999 and 2000.

SP # 10

**PERFORMANCE MEASURE:**

Death rate per 100,000 among youth, ages 15-19, due to motor vehicle crashes.

**STATUS:**

Active

**GOAL**

To decrease the number of deaths to youths, ages 15-19, due to motor vehicle crashes.

**DEFINITION**

**Numerator:**

The number of deaths from motor vehicle crashes in Wisconsin to youths, ages 15-19, during the reporting period.

**Denominator:**

The number of youths in Wisconsin, ages 15-19, during the reporting period.

**Units:** 100000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Wisconsin death certificate data file.

**SIGNIFICANCE**

Motor vehicle crashes are the leading cause of death for youth. Wisconsin's young drivers are more likely to be in a motor vehicle crash than any other age group.

3. **Section Number:** Indicator 05  
**Field Name:** CareFirstTrimester  
**Row Name:** Percent of infants born to pregnant women receiving prenatal care beginning in the first trimester  
**Column Name:**  
**Year:** 2009  
**Field Note:**  
The value for "All" does not equal the value for National Performance Measure 18 because the data sources were different. This value was calculated using a denominator of 69,951 for Wisconsin occurrent and residents births; of these 30,867/69,951 = 44.1% were to women whose birth was paid by Medicaid. The denominator used for National Performance Measure #18 was 72,302 for occurrent births in Wisconsin.  
Source: Bureau of Health Information and Policy, Division of Public Health, Wisconsin Department of Health and Family Services.

### FIELD LEVEL NOTES

- 1. Section Number:** Indicator 09A  
**Field Name:** BAD  
**Row Name:** Annual linkage of infant birth and infant death certificates  
**Column Name:**  
**Year:** 2009  
**Field Note:**  
The SSDI Director is facilitating meetings to discuss linking of both newborn screening and newborn hearing screening files with birth records in SPHERE. Staff have obtained test files, written match criteria, and conducted a pilot of linking files from the SPHERE Birth Record and newborn hearing screening files from WE TRAC with a 99% success rate. The new system for receiving and processing birth records will become operational in 2009 and allow for newborn screening files to also be linked to the newborn hearing screening and birth records.
- 2. Section Number:** Indicator 09A  
**Field Name:** RecentMother  
**Row Name:** Survey of recent mothers at least every two years (like PRAMS)  
**Column Name:**  
**Year:** 2009  
**Field Note:**  
Wisconsin was awarded PRAMS in April 2006; our first survey to mothers who had a live birth in 2007 was mailed in mid-May 2007. We do not expect to have data for analysis until late 2008 or early 2009. Wisconsin PRAMS is a collaborative project between the Bureaus of Health Information and Policy and Community Health Promotion (which administers Title V), Division of Public Health.

## FORM NOTES FOR FORM 21

Data for Form 21 are from several sources, including the US Census, Wisconsin government agencies (Departments of Health and Family Services, Public Instruction, and Office of Justice Assistance).

HSI#06A: US Census.

HSI#07A: 2006 data. In Wisconsin, all live births were classified by race or Hispanic origin of mother into one of six categories: non-Hispanic white, non-Hispanic black/African American, non-Hispanic American Indian, Hispanic/Latino, non-Hispanic Laotian/Hmong, and non-Hispanic other (which are mostly Asian). Wisconsin Department of Health and Family Services, Division of Public Health, Bureau of Health Information and Policy.

HSI#08A: 2006 data. Wisconsin Department of Health and Family Services, Division of Public Health, Bureau of Health Information and Policy.

HSI#09A: The form has a checkbox for whether the data are provisional or final; the data for this form are both provisional and final - depending on the indicator; to clear the form, we checked "provisional". The data for this form come from several sources. Classification of data indicators as required by race/ethnicity are difficult because the race/ethnic classifications are not standardized across agencies.

HSI#10: US Census.

HSI#11: US Census.
