The Office of Maternal, Child, and Family Health (OMCFH) is the agency in West Virginia State government which administers Title V. The OMCFH is located within the State's Bureau for Public Health. The Bureau's overall goal is to attain and maintain a healthier environment for West Virginians by placing special emphasis on community-based programming that facilitates an accessible service delivery system. In line with the Bureau for Public Health, the Office of Maternal, Child and Family Health provides operational guidance and support to providers throughout West Virginia to improve the health of families. In addition to providing funding support for actual service delivery, the Office of Maternal, Child and Family Health funds projects intended to develop new knowledge that will ultimately improve the service delivery of the health community. Title V plans and provides direct services, including care coordination and care management for children with special health care needs through clinics available throughout the state as well as through private health care providers located in a child and family's community, if available. Title V assures access to these clinics and private providers to all children with special health care needs that meet income and diagnostic criteria. The clinical network is staffed by medical school physicians and board certified private practitioners working alongside state employed nurses and social workers. Increasing access for eligible children to participate in EPSDT/HealthCheck services is also a focus of West Virginia's OMCFH which administers the State's EPSDT/HealthCheck Program. The Office also supports a community based network of providers responsible for home visiting, case management, and supportive services offered the perinatal populations (RFTS). All personnel participating in home visiting under the auspices of RFTS are licensed clinical social workers and nurses. Form Level Notes for Form 11

Breastfeeding data from PRAMS - mother initiated and breastfed for any amount of time Data on vlbw infants born at level III nurseries is based on occurrence births for 2006. Performance objectives for performance measure #13 are based on the increase in CHIP eligibility in 20% increments of the FPL up to 300%FPL which will allow more children to receive coverage. For Performance objectives for performance measure #16, it is really hard to estimate because we are dealing with small numbers. For State Performance Measure # 7, data taken from CHIP Annual Report, PEIA data request and the Medicaid form CMS-416. Data for National Performance Measure #9 for 2007 is from the Children's Dentistry Project and is representative of the State's 3rd graders.

PERFORMANCE MEASURE # 01

The percent of screen positive newborns who received timely follow up to definitive diagnosis and clinical management for condition(s) mandated by their State-sponsored newborn screening programs.

With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

The percent of State SSI beneficiaries less than 16 years old receiving rehabilitative services from the State Children with Special Health Care Needs (CSHCN) Program.

	<u>Annual Indicator Data</u>
